THE EDITOR'S PREFACE.

JOHN WALKER, whose name is familiar to every student of the orthoepy of the English language, published his *Rhyming Dictionary* in 1775, twenty years after the publication of Johnson's Dictionary of the English Language, and sixteen before the appearance of his own Critical Pronouncing Dictionary A second edition, however, was not required till 1806, and, as Walker had been an Actor before he became a Teacher of Elocution in London, he naturally dedicated his work to David Garrick, to whose pronunciation on the stage, and frequent advice in the prosecution of his inquiries, he gratefully acknowledges his obligations for no small measure of whatever merit his work might possess We have not had an opportunity of ascertaining the dates of all the subsequent editions, but we believe the last was printed in 1851

Walker certainly had the merit of first producing a work of this sort in the English language on such an extensive scale, for the work of Bysshe to which he refers, and of which the fourth edition was printed in 1710, extends to only thirty-six pages, on each of which are four columns of words without accent or explanation, which amount to a number between six and seven thousand, whereas the present work may claim the title of a sufficient dictionary of the language

A *Rhyming Dictionary*, properly so called, ought to bring together all those words that have the same terminal sound, although they may not end in the same letters, but such a collocation would have complicated the difficulty of finding a particular word and excluded some of the other advantages which the present arrangement affords Hence words that are brought together on account of the similarity of their spelling, such as

hearer or reader, and it is to the peculiarities and ornaments of this outward habit we would briefly invite attention

A little consideration will lead to the conclusion, that verse, in most languages, differs from prose in the return of a certain number of syllables that have a peculiar relation to one another as accented and unaccented, or as long and short It is universally felt that a degree of pleasure arises from this definite arrangement, and the origin of that pleasure is to be traced back to the sense of time with which men are generally endowed It is this principle that regulates the step of a man, or the stroke of an oar, and hence the pleasure we experience in beholding the regular step of a company of soldiers in their march, and the simultaneous sweep of the oars of a well-manned boat The *time* of music, apart from tune, is evidently related to the movement to which we have now referred, and can accordingly be regulated by the properly measured, though monotonous, sound of the drum The tendency to beat time with the "light fantastic toe" in the "giddy dance," is universally felt, and is found to be irresistible, even in the mere spectators The next process was to bring language into conformity with the music thus produced, and the result was verse—a measured or metrical line As these results, therefore, flow from innate principles of our constitution, so, in looking as far back along the history of man as our materials enable us, we find him accompanied with music and verse, for the rude cadence of his song or the movement of his dance is ever accompanied by the tap of the drum

In the Bible, the most ancient of records, we find man, at a very early period, forming both wind and stringed instruments, modulating his speech into verse, and exhibiting in the very earliest instance on record that peculiar parallelism that characterised the Hebrew poetry of all subsequent ages

When we look to language, we shall find that the words suggestive of persons, animals, things, and actions are the most important, other words do little more than connect these principal words or point out their qualities and relations These words, therefore, especially in

public speaking, would either be pronounced with greater force, or lengthened in the pronunciation, that the meaning of the speaker might be the more clearly apprehended, or understood at a greater distance This naturally suggests the words in a sentence on which the emphasis would be placed, and the obvious reason for employing such emphasis What was thus true of a sentence would in process of time become true of a single word, for the noun would have modifying syllables united to it, in order to shew its gender, number, and relation to other words, and the verb would have modifications made on it to indicate the persons acting and the time of the action, but it would naturally occur, that the primary word on which these modifications had been made, especially if a monosyllable, would be indicated by pronouncing it with greater *force* or *length* than the modifying syllables, and hence the natural origin and place of the *accent* of a word In such a collocation of words as forms a sentence, it would rarely happen that the emphatical words or accented syllables would unintentionally succeed one another in such a regular order as would arrest the attention, and gratify the ear by the perception of uniformity in their recurrence But, as already observed, it had been early discovered that there were some, who, through a peculiarly keen perception of such measured sentences and the possession of a copious vocabulary from which to draw their materials, could produce those measured sentences more readily and pleasantly than others, and such persons, partly from the pleasure they afforded their hearers and partly from the belief that they had received this peculiar gift directly from a supernatural source, would be highly esteemed and distinguished among their fellow-men

Syllables thus resolve themselves into emphatical or strong, and unemphatical or weak, or long and short, as they have otherwise been named Referring once more to marching, or beating time with the foot, we may suppose an important word to be uttered at the putting down of each foot, hence two accented or long syllables for a measure, or the first syllable may be strong and the next weak, and so on alternately, or the first syllable may be weak and the second strong, and

neglecting the accent, and that the latter are more dependent on accent, not however, neglecting quantity Syllables among the ancients were considered as either *long* or *short*, according to the length of *time* with which they were respectively pronounced, among the moderns, as *accented* or *unaccented*, according to the *force* with which they are respectively pronounced Two syllables, accordingly, in sequence, may either be both long or both short, or the one may be long and the other short, or the one may be short and the other long, or to express the same ideas by signs, two syllables may be thus arranged, — —, or spondee, ⏑ ⏑, or dibrach, — ⏑, or trochee, and ⏑ —, or iamb, and all these arrangements occur in English poetry, but we shall only represent the two arrangements of *three* syllables that occur in our verse, ⏑ ⏑ —, or anapest, and — ⏑ ⏑, or dactyl Each of those arrangements is called a *foot*, *metre*, or *measure*, and the verse derives its peculiar name from the foot that most abounds in it Among both the Greeks and the Romans the noblest combination of these *metres* is called the *heroic*, from its being generally employed to celebrate the deeds of their gods and heroes, as in the celebrated works of Homer and Virgil We shall briefly direct attention to this species of verse, on account of the influence that it has so long exerted on the productions of subsequent bards It consisted of six of these feet, and hence was called *hexameter* Generally speaking, the last foot must be a *spondee*, and the preceding a *dactyl*, each of the other four might be indiscriminately either a *dactyl* or a *spondee* Hence the number of syllables might vary from *thirteen* to *seventeen*, but much taste and ingenuity might be displayed in the choice of the optional or arbitrary feet in order to render the "sound an echo to the sense," as the spondee was suited to a slow and solemn movement, and the dactyl to a quick and lively one In elegiac verse, an hexameter line alternated with a pentameter, and it is probably from this that we have derived an heroic verse which is *pentameter*, and, as the iamb is the prevailing foot, it is specifically termed iambic As the verse is therefore pentameter and iambic, it necessarily consists of ten syllables Like the hexameter, its last foot is

fixed, and must be a true iamb, but any of the other places may be occupied either with a spondee, dibrach, or trochee

For heroic, narrative, and didactic subjects, this verse has long been employed It is allowed to be of native origin, and Chaucer, the father of English poetry, has generally been accorded the honour of its invention. In its loftiest forms, it is written as blank verse, as in Milton's *Paradise Lost* and *Regained* and Young's *Night Thoughts*, or as rhyming couplets, as in the works of Chaucer, Dryden, Pope, Campbell, Crabbe, Montgomery, and many others In Chaucer, it is comparatively harsh to our ear, but it acquired strength in Denham, sweetness in Waller, a combination of these in Dryden, and, perhaps, perfection in Pope

Let us read the following example from the *Canterbury Tales* —

> " A good man was ther of religioun,
> And was a pore Persoun of a toun,
> But riche he was of holy thought and werk
> He was also a lerned man, a clerk
> That Cristes gospel gladly wolde preche,
> His parischens devoutly wolde he teche —
> Wyd was his parisch, and houses fer asondur,
> But he ne lafte not for reyne no thondur,
> In siknesse ne in meschief to visite
> The ferrest in his parissche, moche and lite,
> Uppon his feet, and in his hond a staf
> *This noble ensample unto his scheep he gaf,*
> But ferst he wroughte, and after that he taughte," &c

Here will immediately be felt, the want of the stately march and harmonious roll of the heroic verse of the present day On examining the passage, this will be found to arise from an apparent defect or superfluity of syllables, thus two syllables are apparently wanting in the fifth line, but by making "Christes" and "wolde" dissyllables, we shall find the verse complete, on the other hand, the twelfth line seems to have two superfluous syllables, but by eliding the final *e* of "noble" and "ensample," or making the termination of these words glide into the beginning of those that follow, we shall get rid of those redundant syllables, and reduce the line to its proper dimensions Let it be remembered, however

that Chaucer was not so fastidious as his successors became, and Dryden had consequently reason to say — "It were an easy matter to produce some thousands of his verses, which are lame for want of half a foot, and sometimes a whole one, and which no pronunciation can make otherwise We can only say that he lived in the infancy of our poetry, and that nothing is brought to perfection at first" It is difficult, from the very abundance, to select a passage that might prove the harmony and strength of this verse in modern times, for the exact prosody and pure rhymes of the *Pleasures of Memory* or of *Hope*, present such examples on every page We shall submit the following —

> "Unfading HOPE! when life's last embers burn,
> Then soul to soul, and dust to dust return!
> Heaven to thy charge resigns the awful hour;
> Oh! then, thy kingdom comes! Immortal Power!
> What though each spark of earth-born rapture fly
> The quivering lip, pale cheek, and closing eye!
> Bright to the soul thy seraph hands convey
> The morning dream of life's eternal day—
> Then, then, the triumph and the trance begin,
> And all the phœnix spirit burns within"

The noblest and most difficult species of this verse is that which has been called *blank*, on account of its wanting rhyme To elevate it, therefore, above prose, into which it is apt to run in unskilful or careless hands, great attention must be given to its rhythm and pauses, apart from the elevation of those sentiments of which it may be considered the appropriate vehicle Marlowe, the greatest of Shakspeare's predecessors, found the drama shackled by rhyming couplets Some were then beginning to throw off this restraint, but the sense as formerly still terminated with the line, which led Nash to characterise it as "the spacious volubility of a drumming decasyllabon" It was therefore reserved for the genius of Marlowe to break up this monotonous uniformity, and to introduce into his blank verse those various pauses that were afterwards to be managed with such consummate art in the harmonious and varied construction of the great Epic of Milton, that will ever afford the proper school for the study of the perfection of the English heroic A critic, in condemning the opinion that the pause

may occur after any syllable in the line, asserts that this is equivalent to saying that there is no place at all for the pause Now, had he examined Milton's lines, he would have found instances of the pause after each syllable, but he would have found that its occurrence after the first and ninth was rare, and that its place occurred more frequently and agreeably after the fourth, sixth, and eighth syllables—the places which the ear had before assigned to them in our lyric poems When the pause occurs after the odd syllables, which are unaccented, the effect is not unpleasant, but the close is deficient in power In such passages as the following, we mark in the first line the pause near the beginning, then receding farther in the next, till the full close is found at the end of the sixth line

> "To nourish, | and superfluous moist consumes,
> But I will haste, | and from each bough and brake,
> Each plant and juciest gourd, | will pluck such choice
> To entertain our angel guest,| as he
> Beholding shall confess, that here, on Earth,
> God hath dispensed his bounties as in Heaven."

Other examples could be given in which the pause is near the end of the first line, more remote in the next, and so on till it approaches the beginning and then begins again to retire farther into the line, but our space forbids

The heroic verse is sometimes formed into a quatrain with alternate rhymes, which, from its employment, has been called the *elegiac* stanza. Dryden considered this the noblest species of versification that our language possesses, but few have been of his opinion It affords greater variety than the couplet, and has a more sonorous melody and stately gait It was in this measure that he wrote his *Annus Mirabilis*, Shenstone wrote many elegies in it that are scarcely remembered, and Gray has written one that will never be forgotten We give the following specimen as embodying sentiments that the Christian sadly misses in the *Country Churchyard* —

"THE GRAVE

> "One place alone had ceased to hold its prey,
> A form had pressed it, and was there no more,
> The garments of the grave beside it lay,
> Where once they wrapped Him on the rocky floor

"He only with returning footsteps broke
The eternal calm wherewith the tomb was bound,
Among the sleeping dead alone he woke,
And bless'd with outstretch'd hands the host around

"Well is it that such blessing hovers here
To soothe each sad survivor of the throng,
Who haunt the portals of the solemn sphere,
And pour their woe the loaded air along

"They to the verge have follow'd what they love,
And on the insuperable threshold stand,
With cherish'd names its speechless calm reprove,
And stretch in the abyss their ungrasped hand"

It has been supposed that we are indebted for our line of *twelve syllables*, commonly called Alexandrine verse, to the French, as that is the measure of their heroic poetry After the Restoration, this verse was used in dramatic compositions, to gratify the taste of the king, whose ear had become familiarised to it during his sojourn in France Dryden also frequently concluded a triplet with an Alexandrine in his heroic verse, but as this suggests that the poet was either unable to pack the idea it contains into the previous couplet, or was unable to find another idea to occupy another line, it has thus, either as an indication of negligence or barrenness, been generally rejected The most considerable poem in English that has been composed in this measure is Drayton's *Polyolbion*, of which the following lines will afford a specimen —

"Then from her burnish'd gate the goodly glittering East
Gilds every mountain top, which late the humourous night
Bespangled had with pearl, to please the morning's sight,
On which the mirthful quires, with their clear open throats
Unto the joyful morn so strain their warbling notes,
That hills and valleys ring, and even the echoing air
Seems all composed of songs about them every where"

The verse of *fourteen* syllables has also been employed in no less considerable a work than Chapman's translation of *Homer*—a work into which he has happily transfused not a little of the spirit of the original After a long interval, the suitableness of this measure to express heroic actions has been justified by its adoption by Lord Macaulay, in his *Lays of Ancient Rome*, although he has occasionally contracted or expanded the

line by a syllable We illustrate by a few lines from *Ivry* —

"Right graciously he smiled on us, as rolled from wing to wing,
Down all our line a deafening shout, 'God save our lord the King,
'And if my standard bearer fall, as fall full well he may—
For never saw I promise yet of such a bloody fray—
Press where ye see my white plume shine, amidst the ranks of war,
And be your oriflamme to day, the helmet of Navarre'"

This is the greatest length to which our lines have been carried, and, in this respect, they bear a close resemblance to the hexameter of the ancients As the pause is uniformly at the end of the eighth syllable, it became convenient in printing to break the line into portions, and this forms the well-known stanza of our psalms and hymns, familiarly known as *common measure*. After the verse had been thus divided, a farther improvement was made upon it by considering each portion as a distinct line, and then making the four lines rhyme alternately This form may be seen in the following stanza —

"Hope, like the glimmering taper's light,
Adorns and cheers the way,
And still, as darker grows the night,
Emits a brighter ray"

On this point, Montgomery has thus expressed his opinion —"It is a great temptation to the indolence of hymn-writers, that the quatrain measures have been so often used by Dr Watts without rhyme in the first and third lines He himself confessed that this was a defect, and, though some of the most beautiful hymns are upon this model, if the thing itself be not a fault, it is the cause of half the faults that may be found in inferior compositions,—negligence, feebleness, and prosing" Notwithstanding the justice of this remark, we observe that most of the *Hymns* in the Dean of Canterbury's *Poetical Works* are in this faulty measure, and still worse, some of them exhibit both styles intermixed

Another form is produced by bringing the two long and the two short lines together, thus —

"Far o'er the glowing western main
His wistful brow was upward rais'd,
Where like an angel's train
The burnish'd water blaz'd"

Another modification in this quatrain was formed by making all the verses octo-syllabic, which form is known as *long measure*, thus —

"Thy precious things whate'er they be,
That haunt and vex thee, heart, and brain,
Look to the Cross, and thou shalt see
How thou mayst turn them all to gain"

Another form of this stanza makes the four lines rhyme in couplets, thus —

"Abide with me from morn till eve,
For without thee I cannot live
Abide with me when night is nigh,
For without Thee I dare not die."

Again, an alternate rhyming quatrain may be conjoined to one rhyming in couplets, when a stanza of the following form is produced —

"Thus in the dew of youth she shone,
Thus in the morn of beauty fell,
Even while we gazed, the form was gone
The life became invisible,
The last best birth, with her last breath
Came in the dark disguise of death,
Grief fill'd her parent's home of love,
But joy her Father's house above"

When the first and fourth, and second and third rhyme together, that form of verse is produced which Tennyson has rendered so familiar in his affecting *In Memoriam* —

"Sphere all your lights around, above,
Sleep, gentle heavens, before the prow,
Sleep, gentle winds as he sleeps now,
My friend, the brother of my love,

"My Arthur, whom I shall not see
Till all my widowed race be run,
Dear as the mother to the son,
More than my brothers are to me"

There is another form of stanza produced by doubling the *first* and *third* lines, thus —

"When sorrow all our heart would ask,
We need not shun our daily task,
And hide ourselves for calm,
The herbs we seek to heal our woe
Familiar by our pathway grow,
Our common air is balm"

Or by trebling them :—

> "Well might you guess what vision bright
> Was present to his raptur'd sight,
> Even as reflected streams of light
> Their solar source betray
>
> The glory which our God surrounds,
> The son of Man, th atoning wounds—
> He sees them all, and earth's dull bounds
> Are melting fast away"

When the common measure stanza has the first lin diminished by two syllables, it is then called *short mea sure*, thus —

> "The fountain in its source
> No draught of summer fears,
> The farther it pursues its course,
> The nobler it appears"

Another form of stanza is produced by adding a rhyming couplet to this quatrain, thus —

> "Night is the time to pray,
> Our Saviour oft withdrew
> To desert mountains far away,
> So will his followers do,
> Steal from the throng to haunts untrod,
> And commune there alone with God"

Or thus —

> "But like a white swan down a troubled stream,
> Whose ruffling pinion hath the power to fling
> Aside the turbid drops which darkly gleam,
> And mar the freshness of her snowy wing,—
> So thou, with queenly grace and gentle pride,
> Along the world's dark waves in purity dost glide"

We find also, in the search for variety, that a measur of *five* syllables has not been rejected —

> "Go not, happy day,
> From the shining fields,
> Go not, happy day,
> Till the maiden yields
>
> "Rosy is the West,
> Rosy is the South,
> Roses are her cheeks
> And a rose her mouth"

The descent from five to *four* syllables, or two Iambi feet, brings us to the shortest measure in English poetry

One could scarcely believe that so much could be packed into such narrow bounds as he will find in the following lines —

> "But I'll come in
> Before my loss
> Me farther toss
> As sure to win
> Under His cross
>
> "Sin, Death, and Hell,
> His glorious name
> Quite overcame,
> Yet I rebel,
> And slight the same"

We seem to have borrowed the *tercet* or triplet from the Italians, but in a less artificial style, as each tercet is independent of the other instead of having the rhymes of the adjoining stanzas interwoven Milton seems to have imitated this measure in his rendering of the vii Psalm —

> "Lest th' enemy pursue my soul,
> And overtake it, let him tread
> My life down to the earth, and roll
>
> "In the dust my glory dead,
> In the dust and there outspread
> Lodge it with dishonour foul"

James Montgomery has written an account of a *Voyage* round the world in triplets, which he thus patriotically concludes —

> "I have seen them one by one,
> Every shore beneath the sun,
> And my voyage now is done
>
> "While I bid them all be blest,
> Britain is my home, my rest,
> Mine own land! I love thee best"

But the most considerable poem in this stanza is the remarkable *Two Voices* of the *Poet Laureate*, of which the concluding stanzas may be given as a specimen —

> "And forth into the fields I went,
> And Nature's living motion lent
> The pulse of hope to discontent.
>
> "I wondered at the beauteous hours,
> The slow result of winter showers
> You scarce could see the grass for flowers.

I wondered while I paced along
The woods were fill'd so full of song,
There seem'd no room for sense of wrong

"So variously seem'd all things wrought,
I marvell'd how the mind was brought,
To anchor by one gloomy thought,

"And wherefore rather I made choice,
To commune with that barren voice,
Than him that said, "Rejoice! rejoice!"

The *Sonnet*, as its name indicates, is also of Italian origin It is composed in ten-syllable verse, and is confined to fourteen lines The first eight lines have but two rhymes, which, with the exception of the first and eighth, rhyme in pairs, the last six have likewise but two rhymes, but they rhyme alternately This description will be better understood by the following example, in which Milton has strictly adhered to the Italian model —

"ON THE RELIGIOUS MEMORY OF MRS CATHERINE THOMSON

"When faith and love, which parted from thee never,
Had ripen'd thy just soul to dwell with God,
Meekly thou didst resign this earthly load
Of death, called life, which us from life doth sever

"Thy works and alms, and all thy good endeavour
Stay'd not behind nor in the grave were trod,
But as faith pointed with her golden rod,
Follow'd thee up to joy and bliss for ever

"Love led them on, and faith who knew them best
Thy handmaids, clad them o'er with purple beams
And azure wings, that up they flew so drest,
And spake the truth of thee in glorious themes
Before the Judge, who thenceforth bade thee rest
And drink thy fill of pure immortal streams"

Bowles revived the sonnet in modern times, Wordsworth still farther rendered it familiar, and no inconsiderable portion of the recently published volume of Dean Alford consists of sonnets All these, however, have deviated considerably from the model we have presented, in the arrangement of the rhymes Perhaps the greatest departure consists in arranging the first twelve lines in three independent stanzas, in each of which the lines rhyme alternately, and concluding the whole by the last two lines in the form of a rhyming

couplet, in which a farther liberty has been taken, but rarely, in making the last line an Alexandrine. The following example is taken from the volume to which we have last alluded —

"TO WINTER

"Welcome, stern Winter, though thy brows are bound
With no fresh flowers, and ditties none thou hast
But the wild music of the sweeping blast,
Welcome this chilly wind, that snatches round
The brown leaves in quaint eddies, we have long
Panted in wearying heat, skies always bright,
And dull return of never-clouded light
Sort not with hearts that gather food for song
Rather, dear Winter, I would forth with thee,
Watching thee disattire the earth, and roam
On the bleak heaths that stretch about my home,
Till round the flat horizon I can see
The purple frost-belt, then to fireside-chair,
And sweetest labour of poetic care"

The *Ottava rima*, or, as it is called, in our prosody, the *Spenserean stanza*, is also of Italian growth, only modified by Spenser's concluding it with an Alexandrine line, which gives it a broader basis, or a more majestic sweep It is in this stanza that the bewitching *Faerie Queen* is described, Beattie revived it in his pensive *Minstrel*, Thomson employed it in his *Castle of Indolence*, Southey in his *Tale of Paraguay*, Campbell in his *Gertrude of Wyoming*, Small in his *Highlands*, and its full powers were exhibited in the wanderings of the sublime and bitter *Childe Harold*

This stanza in its structure bears a close resemblance to the sonnet It consists, however, of only *nine* lines, the first four rhyme alternately, the fifth uniformly takes up the rhyme of the fourth, and the concluding line rhymes with the preceding An extract from the last of these works will illustrate the structure of this noble stanza —

"The sky is changed!—and such a change! O night,
And storm, and darkness, ye are wondrous strong,
Yet lovely in your strength, as is the light
Of a dark eye in woman! Far along,
From peak to peak, the rattling crags among
Leaps the live thunder! Not from one lone cloud,
But every mountain now hath found a tongue,
And Jura answers, through her misty shroud,
Back to the joyous Alps who call to her aloud!"

The true *Ottava rima*, however, as used by Ariosto, presents six lines rhyming alternately, and two of the same length rhyming together at the close

The following stanza, from Rose's translation, exhibits this structure —

> " Let him make haste his feet to disengage,
> Nor lime his wings whom love hath made a prize,
> For love, in fine, is nought but frenzied rage,
> By universal suffrage of the wise
> And albeit some may shew themselves more sage
> Than Roland, they but sin in other guise
> For what proves folly more than on this shelf,
> Thus for another to destroy one's self ?"

Octosyllabic verse, in which the lines rhyme in couplets, has been much used in narrative poetry from the time of Chaucer, who composed in it his *House of Fame*, which Pope, in heroic verse, has rendered so famous as the *Temple of Fame* It requires great attention to counteract its " fatal facility " of leading to diffusion and weakness Much of the narrative portions of Sir Walter Scott's poetical romances is written in this style .—

> " At length the freshening western blast
> Aside the shroud of battle cast,
> And, first, the ridge of mingled spears
> Above the brightening cloud appears
> And in the smoke the pennons flew,
> As in the storm the white sea-mew,
> Then marked they, dashing broad and far,
> The broken billows of the war,
> And plumed crests of chieftains brave
> Floating like foam upon the wave "

These may be considered the principal, they are by no means *all* the forms, in which the ingenuity of our poets has presented what may be considered our lyric Iambic quatrain

We shall now briefly illustrate our other kinds of versification As the Iamb consists of a short and a long syllable, so the Trochee consists of a long and a short Verses characterised by this foot are commonly of the lyric kind, and the accent on the first syllable gives the verse an abrupt and rapid manner

Locksley Hall is a poem of considerable length in the trochaic measure —

"Not in vain the distance beacons. Forward, forward, let us range
Let the great world spin for ever down the ringing grooves of change
Through the shadow of the globe we sweep into the younger day,
Better fifty years in Europe than a cycle in Cathay"

Poe's remarkable poem, *The Raven*, is also composed in this measure, and in its structure shews a wonderful command of language regulated by a delicate sense of harmony —

"Open here I flung the shutter, when, with many a flirt and flutter,
In there stepped a stately Raven of the saintly days of yore
Not the least obeisance made he, not a minute stopped or stayed he,
But, with mien of lord or lady, perched above my chamber door—
Perched upon a bust of Pallas just above my chamber door—
Perched, and sat, and nothing more"

Neither has it been considered unworthy of a place in our hymnology —

"Pilgrim, burthen'd with thy sin,
Come the way to Zion's gate,
There, till mercy let thee in,
Knock and weep, and watch and wait
"Knock!—He knows the sinner's cry
Weep!—He loves the mourner's tears
Watch!—for saving grace is nigh
Wait!—till heavenly light appears"

Montgomery's *Wanderer of Switzerland* is also composed in this measure

"Long before thy sun descend,
May thy woes and wanderings cease,
Late and lovely be thine end,
Hope and triumph joy and peace!
"As our lakes, at day's decline,
Brighten thro' the gathering gloom,
May thy latest moments shine
Thro' the nightfall of the tomb"

Various combinations of this verse, with the addition of two or more lines occur, but it is unnecessary to multiply examples, let the following suffice

"Onward, onward may we press
Through the path of duty,
Virtue is true happiness,
Excellence, true beauty
Minds are of celestial birth,
Make we then a heaven of earth

This verse is not unfrequently employed in those lyrical poems, called Anacreontic —

"Little inmate, full of mirth,
Chirping on my kitchen hearth,
Wheresoe'er be thine abode,
Always harbinger of good,
Pay me for thy warm retreat
With a song more soft and sweet;
In return thou shall receive
Such a strain as I can give."

Let us now close this form of line with a feminine syllable, or double ending; that is, let the last word have the accent on the penult syllable, and we produce the measure in which Longfellow composed his *Song of Hiawatha* —

"She was thinking of a hunter,
From another tribe and country,
Young and tall, and very handsome,
Who one morning in the Spring time
Came to buy her father's arrows,
Sat and rested in the wigwam,
Lingered long about the door-way,
Looking back as he departed."

This verse may be compared to the seventh note in music, which has been characteristically called the *seeking* note, as if the ear sought another note on which to rest, as a more satisfactory close. It has accordingly been alternated with a line ending in a male syllable, and thus is formed a quatrain which is frequently employed in the minor poems of the German poets, as in Schiller's *Pilgrim*, *Longing*, &c., and in which Longfellow composed his sweet, but defective *Psalm of Life* —

"Lives of great men all remind us
We can make our lives sublime,
And, departing, leave behind us
Footprints on the sands of time;

Footprints, that perhaps another,
Sailing o'er life's solemn main,
A forlorn and shipwrecked brother,
Seeing, shall take heart again."

There yet remains to be considered our *Anapestic* verse, in which the characteristic feet are composed of two short syllables and one long. One of the short syllables may be awanting, in which case the line begins

with an Iamb The lines are not confined to a certain number of feet, but lines either of three or four feet are the most common From its general use, we might infer that it is best calculated for the expression of pensive subjects, as in Shenstone's *Pastoral Ballad* —

> "I have fou'nd| out a gift'| for my fair,
> I have fou'nd | where the wo'od|-pigeons bre'ed,
> But let me the plunder forbear,
> She will say 'twas a barbarous deed"

Or in Beattie's *Hermit* —

> "At the clo'se| of the day,| when the ha'm|let is still,
> And mo'r|tals the swee'ts| of forge't|fulness pro've,|
> Where nought but the torrent is heard on the hill,
> And nought but the nightingale's song in the grove"

And yet, as if to shew the versatility of our metres, this very verse, in couplets, has been employed by Goldsmith in his *Retaliation*, by Anstey in his *New Bath Guide*, and by numerous imitators, in light satirical and humorous compositions —

> "If our la'nd|lord supplies | us with beef | and with fi'sh, |
> Let each guest bring himself, and he brings the best dish"

IMITATION OF CLASSICAL METRES.

Frequent attempts have been made to introduce some of the classical metres into English poetry, but the popular ear seems incapable of relishing them To some of these attempts we shall briefly advert The hexameter, which has been considered the noblest of the Greek and Roman measures, and which has been introduced into German versification, has been attempted by Southey, Longfellow, Alford, &c When this verse is purely dactylic, with the necessary exception of the last foot, it has too much of the cadence of a horse at the canter, as in the hackneyed illustration—

> "*Quadrupedante putrem sonitu quatit ungula campum*,"

This is the measure in which Longfellow has composed, and, as some think, spoiled his tales of *Evangeline* and the *Courtship of Miles Standish*, from the latter we give the following illustration —

"Dimly the | shadowy | form of the | May Flower | riding at |
anchor,
Rocked on the rising tide, and ready to sail on the morrow,
Heard the voices of men through the mist, the rattle of cordage
Thrown on the deck, the shouts of the mate, and the sailors' 'Ay,
ay, Sir!'
Clear and distinct, but not loud, in the dripping air of the twilight.
Still for a moment he stood, and listened and stared at the
vessel," &c

When a greater variety of feet is introduced and the peculiar dactylic cadence is lost, the verse seems so closely to resemble English prose, that the poetical rhythm is scarcely perceived, as in the following lines —

"Still, one cannot believe that, if North and South were to sever,
Slavery could endure ten years in its present condition"

Were these lines written without break, one would not readily perceive that they were intended to be poetical, for they could be easily matched by quotations from the prose translation of the psalms, thus —

Why do the heathen rage and the people imagine a vain thing?

God is gone up with a shout, the Lord with the sound of a
trumpet

Several excellent specimens of hexameters, with an occasional slight alteration, might be found in Lord Macaulay's Essay on Dryden —

"Who in a sea fight
Thought of the price of the china which beat out the brains of a
sailor?"

Dr Watts imitated the well-known Sapphic verse, but, as it nearly agrees with the rhythm of some of our secular songs, this association is certainly not calculated to fit it for serious poetry —

"When the | fierce north | wind with his | airy | forces,
Rears up the Baltic to a foaming fury,
And the red lightning, with a storm of hail comes
Rushing amain down,
How the poor sailors stand amaz'd and tremble,
While the hoarse thunder, like a bloody trumpet,
Roars a loud onset to the gaping waters,
Quick to devour them."

The rhythm of these verses will readily suggest to the reader *The Widow* of Southey, and the *Needy Knife-Grinder* of Canning

Tennyson, in his recent volume, has given a few specimens of "experiments" in other classical metres The first, called *Boadicea*, is in Trochaic Tetrameter, which properly consists of eight trochees, but considerable variations are admitted, of which our Laureate has availed himself, by frequently introducing a dactyl in the sixth foot, and occasionally closing his line with a catalectic syllable —

"Roar'd as | when the | rolling | breakers | boom and | blanch on the | preci | pices,
Yell d as when the winds of winter tear an oak on a promontory,
So the silent colony hearing her tumultuous adversaries '

The second of his experiments is entitled *Milton*, and is composed in Horatian verse The first two lines are greater Alcaic, the third line is Archilochian, and the fourth, less Alcaic The nature of the feet will be perceived by the scansion signs which we have placed over one of the stanzas —

"O Mighty-mouth'd | in|ventor of | harmonies,
O skill d to sing of Time or Eternity,
God-gift|ed or|gan voice | of En g|land,
Milton, a | name to re|sound for | ages."

The last of these "experiments" is in *Phalæcian*, or *hendecasyllabic* verse, forming a line of eleven syllables, disposed in the following feet, chiefly trochaic, although Catullus, to whom the Laureate refers, took certain liberties with the first and second —

"Look, I | come to the | test, a | tiny | poem,
All composed in a metre of Catullus"

As the anapest consists of two short and one long syllable, so the dactyl consists of one long and two short Of *Dactylic* Tetrameter or Alcmanian verse, the following specimen is from Southey's *Soldier's Wife* —

"Weary way|-wander er,| lan guid and | sick' at heart,
Travelling painfully over the rugged road,
Wild visaged Wanderer, ah, for thy heavy chance!

"Sorely thy little one drags by thee bare-footed,
Cold is the baby that hangs by thy bending back,
Meagre and livid and screaming its wretchedness"

These stanzas, even from the pen of Southey, prove the difficulty of writing in English dactyls, for of these six lines, only two end with true dactyls, besides, as Robert Hall said on substituting *pierce* for *penetrate*, "no man who considered the force of the English language would use a word of three syllables" at the close of a sentence, "but from absolute necessity" This must have been felt by the ancients, who concluded the true dactylic tetrameter with a spondee and not a dactyl, and the following may therefore be considered a better illustration —

"What though you | tell me each | gay little | rover
Shrinks from the breath of the first autumn day,
Surely tis better, when summer is over,
To die when all fair things are fading away"

Some prosodians, however, have considererd our anapestic verse as strictly a dactylic measure, but we dissent from this decision

Upon the publication of Coleridge's *Christabel*, he stated that it had been constructed upon a new principle, that the number of syllables was not to be regarded, but those syllables on which the emphasis fell As these were four, so the number of syllables in a line might be but four, but as two or three feeble syllables might be added to each of them, the number of syllables might extend to twelve, and yet the melody of the verse be preserved It was astonishing that Coleridge should have called such a principle as this new, seeing that, to a considerable extent, it was the very principle on which the classical hexameter had been constructed, of which he himself had given a description and illustration, and that which is so conspicuous in our ancient ballads This rhythmical, as opposed to numerous verse, has been extensively employed by many of our poets, as imposing upon them less restraint than a more correct prosody would have required

ALLITERATION

Next to the harmonious arrangement of syllables in

verse, we may consider alliteration as a species of poetical ornament It is produced by a succession of words beginning with the same letter It must have been introduced at a very early period, as we find it characterising no fewer than twelve poems in the Holy Scriptures The number of the Hebrew letters, which is twenty-two, determined the length of these alliterative poems, of which each stanza begins with each letter in its alphabetical order It is not necessary that we should describe the metrical structure of all these poems, and, as the alliterative composition of the cxix Psalm must be familiar to all from the names of the letters being prefixed to each division of eight verses, we shall advert to the peculiarities that occur in the structure of the third chapter of the book of Lamentations This poem consists of twenty two stanzas, each stanza contains three lines, and the initial letter of every stanza is also the initial letter of each line of that stanza Any one who consults a *Paragraph Bible* will readily perceive not only that the lines resemble one another in length, and, probably, if we could read the original aright, in the number of syllables, but also that each stanza exhibits a remarkable congruity in sense as well as in structure The following stanzas will illustrate all these statements, with the exception of the alliteration —

"Mine enemies chased me sore, like a bird without cause
They have cut off my life in the dungeon, and cast a stone upon me
Waters flowed over my head, then I said, 'I am cut off!'

"I called upon thy name, O Lord, out of the low dungeon
Thou hast heard my voice, hide not thy face at my breathing, my cry
Thou drewest near in the day that I called upon thee, thou saidst, 'Fear not!'"

To what extent this alliterative ornament prevailed in the poetry of the Greeks and Romans, it is not easy to determine, as poems constructed by them on such a principle may not have come down to us, or there may be, as was the case for a time in the Welsh poetry, a subtile alliteration in those that we possess, that has not yet been discovered

When, however, the more palpable alliteration of

several adjacent words occurred, it is evident that the poet did not avoid it, if he did not court such a succession of similar letters. As the Latin exercised a far greater influence in modifying our language than the Greek, we shall draw our illustrations only from the former. No sooner do we open the works of Virgil than we meet with numerous illustrations of the principle that regulated the construction of the Anglo-Saxon poetry, in the very first Eclogue. We shall only quote a few of them:—

> "*T*ityre, *t*u pa*t*ulæ recubans sub *t*egmine fagi
> Silves*t*rem *t*enui Musam medi*t*aris avena."
>
> "*F*ortunate senex hic inter *f*lumina nota
> Et *f*ontes sacros *f*rigus captabis opacum."
>
> "*C*armina nulla *c*anam; non me pascente, *c*apellæ,
> Florentem *c*ytisum et salices *c*arpetis amaras."

If we take but a cursory look through the Odes of Horace, we shall meet with abundant illustrations:—

> "Sunt, quos *c*urriculo pulverem Olympicum
> *C*ollegisse juvat."
>
> "*P*estemque a *p*opulo et *p*rincipe Cæsare in
> *P*ersas."
>
> "Quis non Latino sanguine *p*inguior
> Cam*p*us se*p*ulcris im*p*ia *p*rœlia."
>
> "Quo graves *P*ersæ melius *p*erirent,
> Audiet *p*ugnas vitio *p*arentum."
>
> "*P*inus aut im*p*ulsa cu*p*ressus Euro,
> *P*rocidit late *p*osuitque collum in
> *P*ulvere Teucro."

The following lines are too remarkable to be omitted, and, although there is no alliterative word in the second line, yet *posecat* occurs in the line immediately preceding:—

> "*P*allida Mors æquo *p*ulsat *p*ede *p*au*p*erum tabernas
> Regumque turres."

As Lucretius is at hand, we shall allow him to furnish his quota of evidence on this point, and so dismiss our Latin witnesses:—

> "Inde feræ *p*ecudes *p*ersultant *p*abula læta,
> Et rapidos tranant amnes."

"Suave, mari *magno* turbantibus æquora ventis,
E terra *magnum* alterius spectare laborem

'Fixa *pedum* pono *pressis* vestigia signis,
Non ita cer'andi cupidus, quam *propter* amore ...

'Et nemora ac monteis gemitu, sylvasque replob
Viva videns vivo sepeliri *viscera* busto

'Aut ubi suspensam *vestem*, chartasve *volantes*
Verberibus venti versant, plangunt que per am ...

Seeing that alliteration prevailed so extensively, more especially in the poetic compositions of the Celtic and Gothic dialects, the assertion of Barry, in his *Description of Wales*, in the twelfth century, will be the more readily received Both the English and Welsh, according to him, were so fond of this figure of speech, which he calls *Annomination*, that they considered no composition elegant, but rather rude and barbarous, in which alliteration was not plentifully employed. They would miss what they had been accustomed to account a poetical elegance, and conclude that the poem had been carelessly composed or that the poet had but a paucity of words

A few specimens may be extracted from one or two of our ancient poets, in order to show to what an extent composition of this kind could be carried

The following specimen is from the *Prolouge* to the Eighth Book of Douglas's Virgil, which consists of fourteen similar stanzas —

"Quhat wikkitness, quhat wanthrift now in warld walkis!
Bale has banist blythness, boist grete brag blawis,
Prattis are repute policy and perillus paukis,
Dygnite is laide doun, derth to the dur drawis,
Of trattillis and of tragedyis the text of al talk is,
Lordis are left landles be vnlele lawis,
Burges bryngis hame the bothe to breid in the balkis
Knychtis are cowhubyis and commouns plukkis crawis,
Clerkis for vncunnandnes mysknawis ilk wycht
Wyffis wald haif al thare wyl,
Ynouch is not half fyl,
Is nowthir ressoun nor skyl
In erd haldin rycht.

Montgomerie in his *Cherry and the Slae*, thus expresses himself —

"The cushat croods, the corbie cries,
The cuckoo cucks, the prattling pyes
To geck her they begin,
The jargoun or the jingling jayes
The crackling craws and keckling kayes
They deav'd me with their din
The painted pawn with Argos eyes,
Can on his mayock call,
The turtle wails in wither'd trees,
And Echo answer'd all,
Repeating with greeting
How fair Narcissus fell,
By lying and spying
His shadow in a well.

Poems continued to be written in English, the verse of which was merely alliterative, down to the commencement of the sixteenth century, and in Scottish, to a still later period

To such an extent had alliteration taken hold of the popular ear that we find it in the jingling titles of books, as *Scot of Scotstarvit's Staggering State of Scots Statesmen*, in many of our proverbs, as "far fowls have fair feathers," and even in sermons, especially in the propositions that constituted the several "heads" of discourse

It is remarkable, however, that the taste that introduced rhyme began to reject alliteration, for we find the critics, and even some of the poets themselves, condemning this principle that had been so generally practised and greatly admired, so early as the time of Chaucer, who, although there are many graceful instances scattered through his works, yet rejected it in the amplitude which it had acquired, and may be considered as indirectly condemning it in the introduction to the *Parson's Tale*, who represents himself as a "southren man," in accordance with the prevailing idea that the minstrel or harper was specially of the "north countrie," and, therefore, acknowledges his ignorance of alliteration, which had been considered essential to poetry —

"I can not geste, rum, raf, ruf, by letter
Ne, [truly], rym hold I but litel better
And, therfore, if you lust, I wol not glose,
I wol you telle a mery tale in prose," &c

So intimately, however, had it been interwoven with the texture of the poetical fabric, that, in 1575, when Gascoigne published his *Notes* concerning the making of Verse or Rhyme in English he exhorts the student to avoid it Shakspeare, in 1598, had still occasion to ridicule the practice, although his ridicule could have been pointed only at the excessive use of this ornament, as his own works exhibit many striking specimens of alliteration The pedantic schoolmaster, Holofernes, having obtained permission to read "an extemporal epitaph on the death of the deer," which, to humour the ignorant, he had called a pricket, says, "I will something effect the letter, for it argues facility," and then read the epitaph beginning—

> 'The praiseful princess pierc'd and prick'd
> A pretty pleasing pricket,
> Some say a sore, but not a sore,
> Till now made sore by shooting,' &c

"We have," in the comedy which we have quoted, it has been said, "many of the forms in which cleverness is exhibited as opposed to wisdom, and false refinement as opposed to simplicity"

This ornament appears in the most complicated form in the poetical compositions of the nations that inhabited the northern districts of Europe, and hence the extent to which we find it prevailing in the poetry of the Anglo-Saxons, and even pervading the works of our modern poets Without describing and illustrating all the refinements in alliteration that the ingenuity of the bards of many generations had produced, we shall advert to that only which was most obvious and common This consisted in making either *all* the principal words in a verse of some length begin with the same letter, or, in lines of less extent, making at least *two* of the principal words in one line and *one* word in the next line, begin with the same letter Thus the fathers of our literature, to adopt the contemptuous language of Milton, put the jingling of like sounds at the beginnings, instead of the endings of words A more refined species of alliteration has been pointed out in the Cymbric poetry, which placed corresponding vowel or diphthongal sounds in the middle of the words of the adjacent lines, and a

similar arrangement may frequently be perceived in the verses of Anacreon The following specimen of the celebrated poem of Caedmon, which was composed before 680, the year of his death, will illustrate these principles :—

" Wera wuldor fæder,
swa he wundra ge-hw
ece dryhten,
oord onstealde
He ærest ge-sceop
ylda bearnum
heofon to hrofe
halig scyppend!
firum foldan,
frea Almihtig!"

This style has been very successfully imitated by Kingsley in his tale of *Hereward, the last of the English* As his vessel, the *Otter*, sailed southwards from Kirkwall, he cheerily sung to his men

" Lightly the long-snake
Leaps after tempests,
Gaily the sun-gleam
Glows after rain.
In labour and daring
Lies luck for all mortals,
Foul winds and foul witch-wives
Fray women alone "

As it is not our intention to give an historical sketch of the progress of the English language, but only a few illustrations of the peculiarities of its poetry, so we now proceed to give a specimen of a work of the fourteenth century, of considerable length and no small merit, which was carefully constructed on the alliterative principle We allude to Langland's *Piers Ploughman.* The follow ng description of the Pardoner will remind the reader of Lindsay's description of the same character in his day —

" There preached a pardoner,
As he a priest were,
Brought forth a bull
With many bishops' seals,
And said that himself might
Assoilen hem all,
Of falsehede of fasting,
Of avowes y-broken

> Lewed men loved it well
> And liked his words,
> Comen up kneeling
> To kissen his bulls
> He bouched them with his brevet,
> And bleared hir eyen,
> And raught with his ragman
> Ringes and brooches."

There can be little doubt, that the affectation displayed in crowding every line with alliteration, by which inappropriate words must often have been employed, and the sense not unfrequently obscured, at last offended a more refined taste and led to its disuse That there is something, however, in alliteration that is gratifying to the reader, and ornamental to poetic diction, is evident from the practice of poets down to the present day Upon a careful inspection of their poems, however, it will appear that it is so sparingly and unobtrusively introduced, that we believe many readers of poetry, while they are gratified through this graceful use of alliteration, are not aware to what their gratification is owing, just as when one is enjoying "the cheering but not inebriating" cup, he does not pause to think of the due proportion in which the several ingredients have been combined That the English language is not essentially or extensively alliterative, may be proved by the facts, that, when it is spoken or written naturally or unaffectedly, the attention of the hearer or reader is not arrested by the alliterative nature of the sentences, and that it requires, therefore, no inconsiderable effort, or even a gift that was considered peculiar to the poet, in order to render his sentences both comparatively natural and alliterative, and that, when a speaker expresses himself happily even by an alliterative antithesis, the sentence not unfrequently excites such applause as would be commanded by a successful witticism This observation is farther confirmed by the large amount of poetry that we now possess which is not alliterative, or in which the alliteration is so sparingly and naturally introduced that it may elude the observation even of those that are familiar with this figure, and that it requires a special search to detect it in its lurking places Alliteration, however, may arise from a principle involved in the very constitution of our

language, and may not be regarded as the mere result of a ready selection of words from a copious vocabulary, because these words must be pertinent to the subject, unless, as Chaucer's Parson has expressed it, the composition is a piece of mere *rum, ruff, ruff*, for the purpose of amusing the ear with the jingle of alliteration, without regard to sense, and it is probable that there were compositions nearly approaching to this character, by which alliteration was brought into contempt When, however, a subject is proposed for discussion or description, it is surely somewhat remarkable, that so many of the words, appropriate to the subject, should begin with the same letter It is this consideration that probably would lead down to the roots of our language, and might discover the cause, why it is so difficult altogether to eradicate alliteration from our speech Thus were we to take gold for an illustration, we should find that, under some aspects, it glows, and in others, gleams, all grasp at it, and many groan under it, when they have received it in gowpens, it gilds the saloon, it glitters on the brow of beauty, and excites the gaze of the multitude, it has been used as a gag to the loquacious, a goad to the indolent, a guerdon to the poet, and, rarely, a gift to the meritorious This subject, however, belongs rather to the profound philologist than to the mere describer of the externals of our English poetry

Those who are familiar with the contempt in which Milton held the tinklings of final syllables, or rhyme, will, perhaps, be surprised to find, on a close inspection, how much he imitated the Anglo Saxons in the jinglings of initial consonants, which, on the same principle, may be held, and by some were held, in equal contempt The prevailing principle of the Saxon alliteration was that at least *two* important words—that is, generally substantives and verbs, to the exclusion of adverbs or prepositions, should begin with the same letter, and *one* such word in the next line Now, in addition to many pairs of alliterative adjectives and nouns throughout the *Paradise Lost*, such as "dark destruction," "hazard huge," "fixed fate," "silent stream," "warring winds," "vast vacuity," "dark descent," "wearied wings," "nocturnal note," "fresh fountain," "fishy fume."

craggy cliff," &c , and many instances of alliterative words not in immediate conjunction, but yet occurring in the same line, as "to make them mirth used all his might," "to taste that only tree," "which declares his dignity—while they keep watch or nightly rounding walk," "the bars of hell an errand bad no doubt," "there *sitting* where *thou durst not soar*," "single against thee wicked and thence weak," "for in his look defiance lours," "the fiend thus answered, frowning stern," "argues no leader but a liar traced," "leaning half raised with looks of cordial love,"—we find such instances of a still more complicated alliteration so frequently occurring in the course of this greatest of epics as to leave no reasonable doubt of the influence that the structure of the Anglo-Saxon poetry had exercised on the mind of Milton, and that, however much he may have contemned the like endings of rhyme, he did not reject the frequent use of the similar beginnings of alliteration Thus it will generally, we do not say universally, be found, that, when *two* important words occur in any line of the *Paradise Lost*, beginning with the same letter, at least *one* important word or a syllable in such word, will be found either in the preceding or in the following line, beginning with the same letter, according to the very practice of him who first sung of *Paradise Lost*, and whose highest praise is, that the reader of his poem is reminded of his great successor

This assertion is illustrated by the very first two lines of the work —

> "Of Man's *f*irst disobedience, and the *f*ruit
> Of that *f*orbidden tree, &c"

To quote the many instances in which this practice occurs would be to quote a large portion of the poem We shall, therefore, present only a few, and leave the reader to discover others, which he will do in the course of every score of lines, as he peruses any portion of this immortal work —

> "Beguiled by *f*air idolatresses *f*ell
> To idols *f*oul

> "The Syrian *D*amsels to lament his fate
> In amourous *d*itties all a summer's *d*ay,

"Tears such as Angels *w*eep, burst forth, at last
*W*ords inter*w*ove with sighs found out their *w*ay

*P*recedence, none, whose *p*ortion is so small
Of *p*resent *p*ain"

"Intermit no *w*atch
Against a *w*akeful foe, while I abroad
Through all the coasts of *d*ark *d*estruction seek
*D*eliverance for us all this enter*p*rise
None shall *p*artake with me Thus saying rose
The Monarch and *p*revented all re*p*ly"

"Or in the emptier *w*aste, resembling air,
*W*eighs his spread *w*ings

"To stoop *w*ith *w*earied *w*ings and *w*illing feet
On the bare outside of this *w*orld

'*F*all circumvented thus by *f*raud, though join'd
With his own *f*olly

"And dying *r*ise, and *r*ising with him *r*aise
His brethren *r*ansomed

"His *b*ack was turn'd, but not his *b*rightness hid
Of *b*eaming sunny rays"

Mark how the terminating words in nearly each of the following lines are all alliterative —

"Yet not rejoicing in his speed though *b*old
Far off and fearless nor with cause to *b*oast,
*B*egins his dire attempt, which nigh the *b*irth
Now rolling *b*oils in his tumultuous *b*reast,
And like a devilish engine *b*ack recoils"

But, obliged to omit passages equally pertinent in every page, we shall quote almost the last lines, as proving that this peculiarity of style which this inimitable poem exhibited at the beginning characterised it to the close

Waved over by that *f*laming brand, the gate
With dreadful *f*aces thronged and *f*iery arms

"They hand in hand, with wandering steps and slow
Through Eden took their solitary way"

Our space precludes us from giving specimens of alliteration from other poets, otherwise we should have found examples in every page of Rogers and Crabbe We therefore omit all these, and content ourselves by stating that it was not despised by Byron, as a few

from numerous examples, taken from *Childe Harold* will amply prove —

> "My mind may lose its *f*orce, my blood its *f*ire
> And my *f*rame perish even in conquering pain
>
> "But here where murder *b*reath'd her *b*loody steam,
> And here where *b*uzzing nations choked the ways.
>
> "The *b*end
> Of stirring *b*ranches, and the *b*ud which *b*rings
> The swiftest thought of *b*eauty
>
> "The *f*ield of *f*reedom, *f*action, *f*ame and blood
> Here a *p*roud *p*eople's *p*assions were exhaled
>
> "And I have loved thee Ocean! and my joy
> Of youthful sports was on thy *b*reast to be
> *b*orne, like thy *b*ubbles, onward from a *b*oy
> I wanton'd with thy *b*reakers"

We shall conclude these illustrations of alliteration with a few examples from the last production of our Poet Laureate, whose tuneful ear and careful study of his art have detected the graceful use of this Saxon ornament in the practice of his great Master in harmonious verse—"the mighty-mouthed inventor of harmonies" —

> "*F*aint as a *f*igure seen in early dawn
> Down at the *f*ar end of an avenue
>
> "Beheld the *d*ead flame of the fallen *d*ay
> Pass from the *D*anish barrow overhead
>
> "Scarce-rocking her *f*ull-busted *f*igure-head
> Stared o'er the ripple *f*eathering from her bows:
> Then *f*ollowed calms
>
> "The horse he *d*rove, the boat he sold, the chill
> November *d*awns and *d*ewy glooming *d*owns
>
> "A *l*ater but a *l*oftier Annie *L*ee,
> Fair-hair'd and tall, and from her *l*ifted hand
> Dangled a *l*ength of ribbon and a ring"
>
> "*B*eating it in upon his weary *b*rain,
> As tho' it were the *b*urthen of a song"

Alliteration also abounds in the *Voyage* —

> "Warm *b*roke the *b*reeze against the *b*row,
> Dry sang the tackle, sang the sail,
> The lady's head upon the prow,
> Caught the shrill salt and sheer'd the gale"

In the *Idylls of the King*, we meet with frequent examples, and some of them afford instances of that alternate alliteration that occurs so often in the *Faerie Queen*, thus —

"*D*eath like a *f*riend's voice from a *d*istant *f*ield."

ASSONANCE

As an intermediate ornament between alliteration and perfect rhyme, a few remarks may be made on *assonance* This can scarcely be regarded as a characteristic of English poetry in past times, and is certainly not to be considered as such in the present day, but as it may be regarded as the principle on which those rhymes that Walker has called "allowable," but which in modern poetry would be called "intolerable," were introduced, it seems here to claim a passing notice Assonance, therefore, is a peculiar correspondence in sound in the termination of verses, less complete than that of rhyme We think it may be detected in the poetry of Greece, but it has been most carefully cultivated in the romantic and dramatic compositions of Spain In assonance, while the vowels of the last accented syllable, and in all subsequent syllables are the same, the consonants must all be different, otherwise *consonance* or rhyme would be produced "Thus *barbaro*, which has the accent on the antepenultimate, is an assonant with *calamo* and *platano* *Buscas*, which is accented on the penultima, is an assonant with *cuan* and *suya* So in English, *hardy*, *manly*, and *carry* would be assonants" Assonants, are not, however, exhibited in pairs, but are continued throughout the whole poem, without any other change than that of blank verse with the assonants Assonants are always used by the classical dramatists of Spain, but in the lyric poetry of that country rhyme is more frequently adopted This principle, we conceive, may account for what would now be accounted imperfect rhymes in our ballad poetry, and thus may have familiarised its use in poems of higher pretensions This imperfection would be less perceived in the song or the ballad, because, as these poems were produced rather to be sung than read, and as the voice

of the singer would dwell on the vowel sounds, it follows that, if these were perfect, the terminating consonants would glide off without producing an unpleasant effect on the ear of the listener It is unnecessary to give examples of a practice so well known, especially as it is not now tolerated in poetical composition, we shall merely note that, in glancing over some productions of ancient minstrelsy, we find the following words associated with one another in the place of rhymes, stand with man, black with hat, sat with clap, town with round, ask with blast, past with glass, mark with hat, heels with fields, leek with sweet, &c, and the same principle may be seen in the following stanza of "the grand old ballad" of *Sir Patrick Spence* —

> "O forty miles off Aberdeen,
> It's fifty fathom deep,
> And there lies good Sir Patrick Spence,
> Wi the Scots Lord at his feet"

RHYME

We have seen at what an early period the poets of Palestine *began* a certain number of lines or stanzas with the same letter, it was, therefore, but a mode of this fashion to *terminate* certain poetical lines with the same letters or sounds, which constituted what has been termed consonance or *rhyme* It is perhaps impossible to trace this ornamental fringe, this purple band on the princely toga of the poet, to its origin, but, although it appears to have been despised by the Greeks and their followers, the Romans, yet there is ground of belief, that it was early exhibited and admired in the East We have found that it was unknown to the Anglo-Saxon poet, whose distinguishing ornament, like a fillet on his priestly brow, was alliteration, and, as fashion in poetry as well as in other matters, has its times, so it may be safely presumed, that, as alliteration began to ebb, so rhyme began to flow, and, as in the case of two tides that run in opposite directions, there will be a middle space in which the direction of the current is doubtful, so we shall find a period in our literature when poems exhibited the double decoration of both alliteration and

rhyme The first of these, in the order of time, was a translation by Layamon of Wace's *Le Brut d'Angleterre*, and, as the poem which he translated was in rhyme, it is probable that this circumstance suggested to him the propriety of endeavouring to imitate his copy in this respect His work is supposed to belong to the latter part of the twelfth century The following is a brief specimen —

> "Tha, at than veorthe dæie,
> The King gon to spekene,
> And agaf his gode cnihten
> All heore rihten,
> He gef seolver, he gæf gold
> He gef hors, he gef lond,
> Castles and clæthes eke,
> His monnen he iquende"

Such is a specimen of early *rhyme*, which henceforth began to hold divided sway with *alliteration*, till the time of Chaucer, when rhyme began to prevail, which henceforth maintained its sway although, as we have seen, alliteration has by no means been banished from the fields of poesy A few early specimens of the mixture of these poetical ornaments may not be unacceptable Our first extract is from the *King of Tars*, the composition of which has been referred to the beginning of the fourteenth century —

> "The Soudan sat at his dess,
> Y-served of the first mess,
> They comen into the hall
> To-fore the prince proud in press,
> Their tale they tolden withouten lees,
> And on their knees gan fall
>
> And said 'Sire, the King of Tars
> Of wicked words is not scarce,
> Heathen hound he doth thee call,
> And, ere his daughter he gave thee till,
> Thine heart blood he will spill,
> And thy barons all'"

As there were some that early despised alliteration, so we find that there were those who equally despised rhyme Ben Jonson spoke of it as

> "Wresting words from their true calling
> Propping verse for fear of falling
> To the ground,

' Jointing syllables, drowning letters
Fastening vowels, as with fetters
They were bound

Marvel, in addressing Milton, says —

" Their fancies like our bushy points appear
The poets tag them, we for fashion wear

And even Dryden, himself so great a master of rhyme says —

" Till barbarous nations, and more barbarous times,
Debased the majesty of verse to rhymes
Those rude at first a kind of tinkling prose,
That limped along and hobbled at the close "

Milton likewise despised these terminal jinglings or tags, yet his consistency is not very apparent in his frequent use of alliteration Whilst rhyme may be dispensed with in the epic, which may be supposed to be sustained by the dignity of the subject and the grandeur of its style, yet, in spite of all that has been said against both alliteration and rhyme, it has been felt that the lower species of poetry require the adventitious aid of these ornaments, which, when the one is judiciously used, and the other employed in its purity, are so far from jarring on the ear that they afford it no inconsiderable pleasure But when alliteration is crowded and rhymes are either impure, or occasion the inversion of the line, then the art of the rhymer, or rather his inability to manage his material, becomes so palpable as to be offensive

Rhyme is not, strictly speaking, " the correspondence of sounds in the terminating words or syllables of two verses," for in true or pure rhymes there must be a dissimilarity connected with this correspondence of sounds, and that dissimilarity will be found in the consonants immediately preceding the terminal sounds Thus the two words *rain* and *reign*, differing both in their orthography and meaning, have an exact " correspondence of sound," but yet they would not therefore form correct rhymes, and we find the reason in the sameness of the initial consonants let us therefore change one of the consonants and we shall immediately have words that constitute perfect rhymes, thus —

" The school we name a world,—for vice and *pain*,
Fraud and contention, there begin to reign "

Or prefix another consonant that will *coalesce* with *r*, and we shall have another word, *brain*, and a perfect rhyme thus —

> "But still, my friend, that ancient spirit reigns,
> His powers support the credit of his *brains* —

Should the *rhyming* syllables, however, both have the same consonant, a syllable prefixed to one of the words will not fit the words for rhyming together Thus, in the following example, the rhyming syllable in both lines is the same, although one of them is preceded by another syllable, and, therefore, the rhyme is improper —

> "What wonder I was all unwise
> To shape the song for your delight,
> Like long-tail'd birds of Paradise,
> That float thro' heaven and cannot light"

The rhymes in the following couplet for a similar reason, are equally faulty —

> "And then, that instant, there appeared the maid,
> By his sad looks in her approach dismay'd"

In the case of a female syllable or double ending, the rhyme is in the accented syllables, and, therefore the differing consonants must precede them —

> "Faint she grew and ever fainter,
> As she murmur'd Oh that he
> Were once more that village painter,
> Which did win my heart from me"

It may be farther remarked regarding double endings, that words ending in *tion* and *ing*, perhaps from the facility of finding them, are avoided by our best poets, neither is it correct to say that double endings are peculiar to ludicrous composition, as is sufficiently evinced by the poem from which the preceding extract has been taken No doubt double endings and compound words are used in ludicrous composition, but they are not essentially ludicrous

Rhyme does not appear to have been admitted into the poetry of the Romans as a uniform ornament, but we frequently find the semifeet of the pentameter constituting rhymes, which we can scarcely suppose occurred *per incuriam*, thus

> "Dum licet, in liquid*a* nat tibi linter aqu*a*"

Ovid's poem, called *Fasti*, is wholly written in Elegiac verse, and affords innumerable examples of this practice; but, instead of giving a number of unconnected lines, we shall rather present a brief passage, in which the frequency of rhyme in the pentameter lines will be readily perceived:—

> 'Quid tibi cum gladio? dubiam rege, navita, pinum.
> Non sunt hæc digitis arma tenenda tuis.
> Ille metu pavidus, Mortem non deprecor, inquit:
> Sed liceat sumpta pauca referre lyra.
> Dant veniam, ridentque moram. Capit ille coronam,
> Quæ possit crines, Phœbe, decere tuos.
> Induerat Tyrio bis tinctam murice pallam:
> Reddidit icta suos pollice chorda sonos.
> Protinus in medias ornatus desilit undas;
> Spargitur impulsa cærula puppis aqua.
> Inde—fide majus—tergo delphina recurvo
> Se memorant oneri supposuisse novo.
> Ille sedens citharamque tenet, pretiumque vehendi
> Cantat, et æquoreas carmine mulcet aquas."

Our own poets, in their minor productions, have apparently imitated this practice in such lines as do not rhyme with their corresponding lines, as in the other verses of the poem; thus Campbell, in *Lord Ullin's Daughter*:—

> 'But still as wilder blew the wind,
> And as the night grew drearer,
> Adown the glen rode armed men,
> Their trampling sounded nearer.'

Tennyson has uniformly adopted this construction in the fifth line of the stanza of *Lady Clara Vere de Vere*:

> "Howe'er it be, it seems to me,
> 'Tis only noble to be good.
> Kind hearts are more than coronets,
> And simple faith than Norman blood."

As our remarks and examples, however, have far exceeded the bounds prescribed to us, we must now conclude with the hope that they may both interest the admirer of verse, and aid the youthful aspirant to poetic f[illegible].

INTRODUCTION

INTRODUCTION

Among the various attempts to facilitate the orthography and pronunciation of the English language, it is not a little surprising that the method here adopted should have been either totally overlooked or neglected. A Rhyming Dictionary in a living language, for the purposes of poetry, seems no very unnatural or useless production, and imperfect sketches of such a work have already been given us by Poole and Bysshe; but no one has hitherto thought of making a dictionary of terminations subservient to the art of spelling and pronouncing. The more obvious use of a work of this kind was perhaps an obstacle to the completion of it, and its latent, though more useful qualities, were by this means unobserved. A mere rhyming dictionary was looked on either as a bauble for school boys, or a resource for poetasters; and the nobler ends of pointing out the analogy of orthography and pronunciation, like many other advantages, were overlooked in the insignificancy and puerility of the means.

Johnson's Dictionary is scarcely more valuable for so nicely tracing the various and almost vanishing shades of the same word, than for furnishing us with so copious a collection of nearly similar words of a different form. Those who understand the harmony of prose, pay a cheerful tribute to Dr. Johnson on this account, as he admits them to a more easy and extensive view of the powers of the language than can possibly be suggested by the memory alone; and by this means assists that delicacy of choice, on which the precision and harmony of expression so essentially depend. This advantage, which perhaps was not foreseen by Dr. Johnson himself, was no more than a necessary, though not an obvious, consequence of so copious and perfect a distribution of the language into its constituent parts; and without the vanity of pretending to a parallel, it may naturally be presumed, that an arrangement, which is perfectly new,

may possibly produce advantages which were entirely unnoticed before this arrangement was actually drawn out, for experience furnishes us with a variety of instances of unexpected improvements arising from new, and perhaps fortuitous combinations, which were never suspected by theorists, until a discovery had been made

The English Language, it may be said, has hitherto been seen through but one end of the perspective, and though terminations form the distinguishing character and specific difference of every language in the world, we have never till now had a prospect of our own, in this point of view Dr Wallis has, with great penetration and sagacity, shown the general import of initial consonants, and with more appearance of truth than could have been conceived, has evinced, that words of a similar signification, which are radically English, commence with nearly the same radical articulations Mr Elphinston too has given us a very good idea of the general import of terminations, by strictures on the greatest part of them, but none have yet thought it worth their while to give us a complete and alphabetical enumeration of the whole, by which alone we can have an adequate idea of every part In this arrangement of the language, we easily discover its idiomatic structure, and find its several parts fall into their proper classes, and almost every word as much distinguished by its termination as its sense We at one glance perceive the peculiar vegetation of our own language, and the alteration foreign words undergo, by being transplanted into English soil And thus by an acquaintance with the specific character of every termination, we are the more readily led to assimilate foreign terms, by stamping them with the current impression of our own

ORTHOGRAPHY

But an analogical insight into the recesses of formation is not every advantage arising from this new and complete prospect of it Our orthography is not only an insuperable difficulty to foreigners, but an [endless] source of dispute and perplexity to ourselves, and, though it would

be in vain to think of removing every intricacy that is constantly arising from indolence and caprice, yet that a considerable number may be remedied by a view of the general laws of formation, will be readily conceived by those who enquire into the origin of the difficulties complained of By an affectation of approximating to the orthography of the learned languages, we have rooted out many useful letters that sprang up naturally with exotic words, and have been led to exclude all letters in our compounds which are not actually pronounced, though their existence in these words is often no less necessary to prevent ambiguity than in the simples themselves

Thus the useful servile *e* is hardly ever suffered to have a place in composition, though, from a feeling of its importance, we are almost intuitively tempted to let it remain in the branches, whenever we recollect it in the root The omission or insertion of this letter occasions a numerous catalogue of rules and exceptions The other serviles, *l*, *s*, &c are no less absurdly omitted in composition, though their power remains, and by this means both orthography and pronunciation are confounded The duplication of consonants, when an additional termination is assumed, forms another difficulty in our terminational orthography, as it may be called which has embarrassed the most correct and accurate writers Now the only clew to extricate us from this labyrinth seems the method here adopted An immediate view of the similar formation of similar parts of speech, gives us a competent idea of the laws of terminational orthography, and enables us to detect the least violation of them Thus when in our best dictionaries I find *saleable*, *tameable*, and a few other words of the same form, retain the silent *e*, I conclude these are either slips of the pen, or errors of the press, for that the whole current of similar endings, as *blamable*, *adorable*, *definable*, &c. omit the e, and that no reason appears for retaining it in the former, and not in the latter words

But in order to detect the orthographical irregularities of our language, it will be necessary first to lay down such general maxims in spelling as have almost universally taken place By these we may judge of the impropriety

of those deviations, which are owing perhaps to a want of seeing the laws of formation as here exhibited, and knowing how far the irregularity extends.

ORTHOGRAPHICAL APHORISMS

APHORISM I.

Monosyllables ending with *f*, *l*, or *s*, preceded by a single vowel, double the final consonant; as *staff*, *mill*, *pass*, &c. *of*, *if*, *as*, *is*, *gas*, *has*, *was*, *yes*, *us*, *thus*, are the only exceptions; and *add*, *butt*, *ebb*, *egg*, *odd*, *err*, *buzz*, are the only words where other consonants are doubled in the same situation.

APHORISM II.

Words ending with *y*, preceded by a consonant, form the plural of nouns, the persons of verbs, verbal nouns, past participles, comparatives, and superlatives, by changing *y* into *i*; as *spy*, *spies*, *I carry*, *thou carriest*, *he carrieth*, or *carries*, *carrier*, *carried*, *happy*, *happier*, *happiest*; but the present participle in *ing* retains the *y*, that *i* may not be doubled, as *carrying*; *y* preceded by a vowel is never thus changed, as *boy*, *boys*, *I cloy*, *he cloys*, &c.

Observations.

By this rule we may perceive the impropriety of writing *flyer* for *flier*, and *defyer* for *defier*, and the still greater impropriety of writing *fatner*, *oftner*, and *softner*, for *fattener*, *oftener*, *softener*; though we meet with them in our best dictionaries; for the common terminations of verbs, verbal nouns, participles, &c. never occasion any contraction in the radical word; *entrance* and *remembrance* pretend kindred with the French *entrant* and *remembrer*, and are therefore incorrigible; but *wondrous* ought to be written with the *e*, as well as *slanderous*; and if we write *dexterous*, why should we see *sinistrous*?

APHORISM III.

Words ending with the hissing consonants, *ch*, *s*, *sh*, *x*, *z*, form the plural of nouns by adding *es*, and the persons of verbs by *est*, *eth*, or *es*; as *church*, *churches*, *I march*, *thou marchest*, *he marcheth*, or *marches*. Gen-

tives of words ending in these consonants are formed by adding *s* with an apostrophe, as *St. James's church*, the *church's ceremonies*

APHORISM IV

Words ending with any consonant and silent *e*, form their plural by adding *s* only, as a *place*, *places*, and persons* of verbs, by adding *st*, *th*, or *s*, as *I place, thou placest, he placeth*, or *places*. Genitives of words ending with these letters are formed by adding *s* with an apostrophe, as the *place's pleasantness*. Material adjectives in *y*, and comparatives in *ish*, are formed from substantives of this termination by omitting the silent *e*, and annexing *y* or *ish* to the consonant, as *ropy*, *winy*, *slavish*, *swinish*, &c from *rope*, *wine*, *slave*, *swine*, &c. The past participles, verbal nouns, and comparatives and superlatives, add *d*, *r*, and *st*, to the simple, as *placed*, *a placer*, *wise*, *wiser*, *wisest*, but the present participle cuts off the *e*, and annexes *ing*, as *placing*. However, where the silent *e* is preceded by the soft *g*, the *e* must be preserved, if the sense of the word would otherwise be ambiguous, for we have no other means of distinguishing *singeing*, the participle of *to singe*, from *singing*, the participle of to *sing*; *swingeing*, from *swinging*, &c. As to *cringing*, *twinging*, &c from *cringe*, *twinge*, &c, we trust to the common power of the letters, as we have no verbs to *cring*, *twing*, &c, to occasion any mistake, for with respect to participles and verbal nouns, a previous knowledge of the theme is supposed to be indispensably necessary. See Aphorism x.

APHORISM V

Words ending with a single consonant, preceded by a single vowel, and with the accent on the last syllable, upon assuming an additional syllable, beginning with a vowel or *y*, double the consonant, as to *abet*, *an abettor*, *to begin*, *a beginning*, *a fen*, *fenny*, *thin*, *thinnish*, &c but if a diphthong precede, or the accent be on the preceding syllable, the consonant remains single, as *to toil*, *toiling*, *to offer*, *an offering*, &c.

•

as well as *stiffness*, *gruffness*, *crossly*, and *crossness* ? Na the propriety of this orthography makes it almost impo sible to root it out entirely, and we find these fou words, *illness*, *fellness*, *shrillness*, and *stillness*, left in ou best dictionary with the double *l*, but a greater numb of words of the same form having the single *l*, as *sma ness*, *talness*, *chilness*, *dulness*, *fulness*, and the long cata logue of words of this termination, as *wilfulness*, *blissfu ness*, &c , sufficiently show to which orthography custo has the greatest partiality , and indeed as the rage fo curtailing our language of double letters seems incurabl the disease will at least be more tolerable if we dete mine its progress to some uniformity, and since there no hope of restoring the lost *l* to

Smalness *Talness* *Chilness* *Dulness* *Fulness* And its numerous compounds,	why should we write	*Illness* *Fellne* *Shrill* and *Stillness*,

unless we are determined to have no rule for our ortho graphy, good or bad ? This rule likewise serves to co rect several typographical errors in our best dictionar as *carelesly*, *needlesly*, &c , for *carelessly*, *needlessly*, &c *

APHORISM VIII.

Ness, *less*, *ly*, and *ful*, added to words ending wit silent *e*, do not cut it off, as *paleness*, *guileless*, *closel peaceful*, &c , except *e* is preceded by a vowel, and the it is omitted as *duly*, *truly*, from *due*, and *true*

Observations

But what shall we say then to *bluely*, *blueness*, *ruefu* &c , which, strange as it may seem, would be more agre ably to the general current of orthography, written *blul bluness*, *rufnl*, &c The reasons seem to be these whe ever the general laws of pronunciation in compound supply the place of serviles in simple words, there th serviles are omitted , but *bluly*, *bluness*, *ruful*, &c , a

* These observations are not now applicable, as *smallness*, *ta ness*, *chillness*, *dullness*, *fullness*, &c , are written with a double *l*

cording to the common rule of pronouncing, would be as justly sounded as *bluely*, *blueness*, *rueful*, &c , and at the same time would preclude the possible mistake which might arise if the simples *blue* and *rue* were not understood to be the root of the words in question , for in this case *blueness* and *rueful* might be pronounced as if divided into *blu-e-ness* and *ru-e-ful* , but as it is necessary the spelling should convey the sound of the compound, without supposing a previous knowledge of the simples, and without being liable to a double pronunciation, the omission of *e* in *bluly* and *bluness*, as well as in *duly* and *truly*, seems most analogical —*See* Aphorism x

This rule serves to rectify several mistakes of the press in our best dictionary

Chastly	for	*Chastely*
Chastness		*Chasteness*
Fertily		*Fertilely*
Genteely		*Genteelly*
Blithly		*Blithely*

Nor can *wholly*, though universally adopted, make us forget that it ought to be *wholely*

APHORISM IX

Ment added to the words ending with silent *e*, preserves the *e* from elision, as *abatement*, *incitement*, *chastisement*, &c , but, like other terminations, changes the *y* into *i*, when preceded by a consonant, as *accompaniment*

APHORISM X

Able and *ible*, when incorporated into words ending with silent *e*, almost always cut it off, as *blamable*, *curable*, *sensible*, but if *c* or *g* soft come before *e* in the original word, the *e* is then preserved, as *changeable*, *peaceable*, &c

Observations

This exception is founded on the necessity of showing that the preceding *c* and *g* in these words are soft, which might possibly be mistaken, and pronounced hard, if written *changable*, *peacable*, &c Another exception seems to take place in the compounds of *move* and *prove*, which are generally written *moveable*, *proveable*, &c , but on an inspection into all the compounds of these

words in "Johnson's Dictionary," we find the *e* so often omitted as to make it very doubtful whether these words are an exception to the general rule or not, for thus they stand—

Unimproveableness *Proveable* *Irreproveable* *Unreproveable* *Unimproveable*	*Reprovable* *Improvable* *Improvableness* *Improvably* *Approvable* *Approvance*
Moveable *Moveably* *Moveableness* *Unremoveable* *Unremoveably*	*Removable* *Irremovable* *Immovably*

The uncertainty of our orthography in this class of words may be presumed to arise from a confused idea of the necessity of ascertaining the sound of the simple by inserting the silent *e*, and the general custom of omitting this letter when words are compounded with these terminations, and it will require some attention to discover to which of these modes of spelling we ought to give the preference, however, till better reasons are offered for a decision, let us suppose the following —

The first object of spelling compound words seems to be merely a conveyance of the sound, without necessarily supposing a knowledge of the simples, that the elements of which the compound is formed, may be sufficient of themselves to suggest their sound The next object of spelling compounds seems to be an omission of all serviles in the simples which were not actually sounded, and whose use may be supposed to be superseded in the compounds by the general laws of English pronunciation, which, contrary to those of the learned languages, suppose every accented vowel to be long and open, which is followed but by a single consonant Thus the *e* in *desirable* is omitted, because the common rules of pronunciation indicate that the accent upon *i*, followed by a consonant succeeded by a vowel, with the accent upon it, has necessarily the same sound as in *desire* But when the radical letters have not their ordinary sound in the

simples, the first law of orthography takes place, and inserts the servile *e* to suggest the sound of the simple, when blended with the compound, for though we are frugal of our letters to a fault, yet when the sound of any of the radical letters might be endangered by such an omission, we then find the *e* preserved. Nor is a previous knowledge of the simple supposed to be a sufficient security, as in *changeable*, *peaceable*, &c From hence we may gather that every compound word is supposed to convey its own sound agreeably to the common sound of the letters, without the necessity of having recourse to a knowledge of the simples from which it is formed, and therefore as the sound of *o* in *move*, *prove*, &c, is not the general sound of that letter, and consequently if the *e* were not preserved to suggest the simple, it might be liable to the sound of *o* in *rove*, *grove*, *love*, or *shove*, we find it perfectly agreeable to the first general law of English orthography to retain the letter by which alone the sound of the radical part of the word can be ascertained, and therefore as we very justly write *moveable*, *proveable*, &c, so we ought to write *removeable*, *improveable*, &c, *moving*, *proving*, &c, being affections of the verbs *move* and *prove*, necessarily suggest their simples, and make the insertion of *e* unnecessary —*See* Aphorism iv

With respect to *reconcileable*, *unreconcileable*, and *reconcileableness*, which we find in Johnson with the *e*, though *irreconcilable*, *irreconcilably*, and *irreconcilableness*, are without it, we must class these with *saleable*, *tameable*, *unshakeable*, *untameable*, and *sizeable*, for as these are the only words of this form in the whole language where the silent *e* is preserved, it is reasonable to suppose that its insertion here was owing to the inadvertence either of the author or printer, for as the preservation of *e* in these words is founded on such reasons as would oblige us to preserve the silent *e* in all compounds where it is now omitted, and consequently entirely alter the current orthography, the omission of it, wherever the preceding vowel or consonant retains its general sound, is certainly the most analogical, as there is no more reason for retaining the silent *e* in *saleable*, *tameable*, &c than in *blamable*, *tunable*, *consumable*, &c. *tithe-*

ible **has a proper claim to the *e*, to show that *th* has its flat or obtuse sound**

APHORISM XI

The verbs *to lay*, *pay*, and *say*, by an unaccountable caprice, form their preterites and participles passive, by changing *y* into *i*, and omitting *e* in the assumed termination *ed*, and instead of *layed*, *payed*, *sayed*, we always see *laid*, *paid*, *said*, which orthography is preserved in their compounds, as *unlaid*, *unsaid*, *repaid* This is an exception to Aphorism ii

APHORISM XII

Words taken into composition often drop those letters which were superfluous in their simples, as *Christmas*, *dunghil*, *handful*, &c

Observations

The uncertainty of our orthography in this article calls loudly for reformation, and nothing can better show the danger of indulging this excision, than a display of the diversity that reigns in Johnson's Dictionary

To recall	*To miscal*	*Clodpoll*	*To enrol*
To comptroll	*To control*	*To undersell*	*To foretel*
Snowball	*Overfal*	*Watermill*	*Downhil*
Saveall	*Headstal*	*Windmill*	*Dunghil*
Laystall	*To forestal*	*Numbskull*	*Handful*
Rakehell	*To bethral*	*Hourglass*	*Dareful*
Bridewell	*To inthral*	*To repass*	*To reinstal*
Drawwell	*Downfal*	*Unbiass*	*Bias*
Molehill	*Muckhil*	*Quarterstaff*	*Windfal*
Uphill	*Downhil*	*Tipstaff*	*Waterfal*
Handmill	*Thumstal*	*Scurvygrass*	*Twibil*

The origin of this ridiculous irregularity which has prevailed within these few years, is not hard to guess Some shallow writers, or perhaps printers, have heard that good authors have complained that our language is clogged by clusters of consonants This was sufficient to set these smatterers at work on so easy a business as that of unloading the language of its useless letters, and we find, under the notion of useless letters, and clusters of consonants, we are near being deprived of

the most useful letters we have. But words are evidently mistaken for things. Clusters of consonants to the ear are very different from assemblages of consonants to the eye; these are often no more than double consonants of the same kind, and are sounded as easily as single ones; but those knots of discordant consonants to the ear, however disgustful, are not to be removed without entirely altering the language. The clusters of consonants of which Mr. Addison complains, are those that arise from sinking the intervening vowels in pronunciation, as *drown'd*, *walk'd*, *arriv'd*, for *drowned*, *walked*, *arrived*. The double letters at the end of words, which are ridiculously confounded with what is termed clusters of consonants, as to *install*, *windfall*, *handfull*, &c., are often so essentially necessary to preserve the true sound from being mistaken, that if we deprive words of one of these double letters, they are in danger of degenerating into a different sound; for what security have we but a previous knowledge of the simples, which is contrary to the first principles of our orthography, that the last syllable of *waterfal* is not to rhyme with the first of *shallow*, and the last of *handful* with the monosyllable *dull*?

In short, as Mr. Elphinston very justly, as well as pleasantly, observes, "Every reader, both young and old, must now be so sagacious an analyst, as to discern at once, not only what are compounds, and what their simples, but that *al* in composition is equal to *all* out of it; or, in other words, that it is, both what it is, and what it is not."—*Prin. Eng. Lan.* vol. i. p. 60.

Thus have I ventured, with a trembling hand, to point out a few of the most glaring inconsistencies under which the orthography of our language labours, without daring to make the least step to a reformation myself; for if ever this be done to any good purpose, it must certainly be by the joint labour of both our universities; till when, no individual can do better service to the orthography of his country, than to let it remain as it stands at present in that monument of English

Note.—Some of these double letters have been inserted by the subsequent editors of Johnson's Dictionary; but whether from the remarks here made or their own sagacity, we are not informed.

philology erected by Johnson Those who see beyond the surface, regret the many deviations from that only standard of our language by the Greeklings and Latinitasters of this smattering age, and it is certainly to be feared, that, if this pruning of our words of all the superfluous letters, as they are called, should be much farther indulged, we shall quickly antiquate our most respectable authors and irreparably maim our language

SYLLABICATION

As the inverted order of arrangement gives us a consistent idea of the structure of language, so a division of words into syllables directs us in their sound, for the division here adopted is not founded on any rules drawn from etymology, or the practice of languages essentially different from our own, but on such principles as are the result of the language itself, and arise naturally from the very nature and practice of pronunciation This part of language, which has been left to chance or caprice, is of all others the most important and delicate Hardly anything like a system has been chalked out, or have any rules been given that have produced the least uniformity, or answered any valuable purposes of pronunciation Till Dr Kenrick's Rhetorical Dictionary, we have scarcely seen anything like an attempt to divide words as they are pronounced, but the Latin and Greek syllabication implicitly adopted, to the evident disadvantage of children, and embarrassment of foreigners, and for the very same reasons that Ramus contends we ought to divide *doctus* and *Atlas* into *do-ctus* and *A-tlas*, Mr Ward insists we must separate *magnet*, *poplar*, *lustre*, and *reptile* into *ma-gnet*, *po-plar*, *l -stre*, and *re-ptile*

Now if the end of syllabication may be supposed to be the most likely method of directing us to the means, we shall find nothing can be more absurd than such a division For the object of parcelling out a word into distinct portions, seems to be to instruct us either in its etymology or pronunciation If in the division of words into syllables we have only etymology in view, we must undoubtedly resolve compounds into their simples, without paying the least attention to the sound of these simples, either as united, or in a state of separation.

But though this method of syllabicating be very proper when we would investigate the origin of a word and show its derivation, yet, when a distinctness of sound is the only object of such a division, as is ever the case in the pronunciation of language, it would be the highest absurdity to clog the instruction with etymological divisions, as these are frequently opposite to actual pronunciation Here then, sound alone should be the criterion of syllabication, and we ought to reduce a compound word to its simple impulses of the voice, as we would a bar of music to its simple notes, for etymologists may surely content themselves with their own divisions where sound is not in question, without disturbing those whose principal object is the conveying of sound, and who consider etymology as entirely independent on it

Easy, however, as such a division may appear at first view, an attempt to extend it to every word in the language will soon convince us that the ear in a thousand instances will prove but a very uncertain guide, without a knowledge of those principles by which the ear itself is insensibly directed, and which, having their origin in the nature of language, operate with steadiness and regularity in the midst of the ficklest affectation and caprice It can scarcely be supposed that the most experienced speaker has heard every word in the language and the whole circle of sciences pronounced exactly as it ought to be, and if this be the case, he must sometimes have recourse to the principles of pronunciation, when his ear is either uninformed or unfaithful. These principles are those general laws of articulation, which determine the character, and fix the boundaries of every language, as in every system of speaking, how ever irregular, the organs must necessarily fall into some common mode of enunciation, or the purpose of Providence in the gift of speech would be absolutely defeated These laws, like every other object of philosophical inquiry, are only to be traced by an attentive observation and enumeration of particulars, and when these particulars are sufficiently numerous to form a general rule, an axiom in pronunciation is acquired By an accumulation of these axioms, and an analogical comparison of

them with each other, we discover the deviations of language where custom has varied, and the only clew to guide us where custom is either indeterminate or obscure.

Thus, by a view of the words ending in *ity* or *ety*, find the accent invariably placed on the preceding syllable, as in *diver'sity*, *congru'ity*, &c. On a closer inspection I find every vowel in this antepenultimate syllable, when no consonant intervenes, pronounced long,* as *de'ity*, *pi'ety*, &c.; a nearer observation shows me that if a consonant intervene, every vowel in this syllable but *u* contracts itself, and is pronounced short, as *sever'ity*, *curios'ity*, *impu'nity*, &c. I find too, that even *u* contracts itself before two consonants, as *cur'vity*, *tacitur'nity* &c., and that *scarcity* and *rarity** (for whose irregularity good reasons may be given) are the only exceptions to this rule throughout the language. And thus we have a series of near seven hundred words, the accentuation of which, as well as the quantity of the accented vowel, is reduced to two or three simple rules.

The same uniformity of accentuation and quantity, may be observed in the first syllable of those words which have the accent on the third, as *dem-on-stra'tion*, *dim-i-nu'tion*, *lu-cu-bra'tion*, &c., where we evidently perceive a stress on the first syllable shortening every vowel but *u*, and this in every word throughout the language except where two consonants follow the *u*, as in *cur-vi-lin-e-ar*, or where two vowels follow the consonant that succeeds any other vowel in the first syllable, as *de-vi-a'tion*, or lastly, where the word is evidently of our own composition, as *re-con-vey*: but as *u* in the first syllable of a word, having the accent on the third has the same tendency to length and openness as was observable when it preceded the termination *ity*, I find it necessary to separate it from the consonant in *bu-ty-raceous*, which I have never heard pronounced, as well as in *lucubration*, which I have, and this from no pretended agreement with the quantity of the Latin words these are derived from, for in the former word the *u* is doubtful; but from the general system of quantity I see adopted in English pronunciation. This only will direct an

* Some orthoepists do not now account *rarity* an exception

English ear with certainty, for though we may sometimes place the accent on words we borrow from the Greek or Latin on the same syllable as in those languages, as *acu'men*, *elegi'ac*, &c, nay, though we sometimes adopt the *accent* of the original with every word of the same termination we derive from it, as *assidu'ity*, *vidu'ity*, &c, yet the quantity of the accented vowel is so often contrary to that of the Latin and Greek, that scarcely the shadow of a rule can be drawn, in this point, from these languages to ours Thus, in the letter in question, in the Latin *accumulo*, *dubious*, *tumour*, &c, the first *u* is every where short, but in the English words *accumulate*, *dubius*, *tumor*, every where long *Nuptialis*, *murmur*, *turbulentus*, &c where the *u* in the first syllable in Latin is long, we as constantly pronounce it short in *nuptial*, *murmur*, *turbulent*, &c Nor indeed can we wonder that a different economy of quantity is observable in the ancient and modern languages, as in the former, two consonants almost always lengthen the preceding vowel, and in the latter as constantly shorten it Thus, without arguing in a vicious circle, we find that as a division of the generality of words as they are actually pronounced, gives us the general laws of syllabication, so these laws, once understood, direct us in the division of such words as we have never heard actually pronounced, and consequently to the true pronunciation of them For these operations, like cause and effect, reflect mutually a light on each other, and prove that, by nicely observing the path which custom in language has once taken, we can more than guess at the line she must keep in a similar case, where her footsteps are not quite so discernible So true is the observation of Scaliger, *Ita omnibus in rebus certissima ratione sibi ipsa respondet natura* — De causis Ling Lat

PRONUNCIATION

Syllabication *having sound for its object*, and the association of similar terminations contributing so largely to facilitate syllabication, it is evident that the most obvious advantage of this inverted prospect of our language is the assistance it affords to pronunciation In other dictionaries, words of a totally different form promiscuously suc-

ceed each other, while in this we find the words sorted by their species as well as letters. It is recommended by Mr Sheridan, in his Lectures on Elocution, to select those words which we find difficult to pronounce, and to repeat them frequently till a habit is acquired This rule is founded on good sense and experience, and ought to be carefully attended to by foreigners and provincials; but if the difficulty of pronouncing lies in the latter syllables, as is most frequently the case, what immense labour must it be to select these from a common dictionary? But in this, how readily are we introduced to the whole species of any termination at once, and by seeing the whole class, gain an intimate acquaintance with its specific orthography and pronunciation, for by this means, not only a more precise idea of the spelling of words is obtained, and an opportunity of habituating the organs to every difficult termination, but the dependence of accent on termination is at large displayed, and a habit induced of associating the stress with its correspondent ultimate syllable This view of accent will show us that our language is much less irregular than is generally imagined, and we soon discover termination to be, as it were, a rudder to accent, a key that opens to us an unexpected scene of uniformity, and proves, as Mr Elphinston admirably expresses it, "that speech, the peculiar glory of rational intercourse, is neither given nor guided by an arbitrary power, but that use in language, as in all nature, is no other than the constant agency of harmony and of reason"—*Prin Eng Lan.* vol i p 3

There are few but must observe with what difficulty children, and even youth, acquire a secure pronunciation of the technical terms in the learned professions, and how frequently they are at a loss for the sound of an English word they have not been accustomed to even at the time they are making great advances in the learned languages This observation will naturally lead us to presume that the present work, of all others, must be the most useful for such schools as are not entirely negligent of their mother tongue Here the words of any difficulty are selected in a moment, and by being repeated a few times over in the order they lie, will imbue the ear with

such an accentual rhythmus, if I may call it so, as will infallibly regulate the pronunciation ever after

The division and accentuation of words, according to the length or shortness of the vowels, is an advantage to pronunciation which must strike the most cursory inspector The utility of such a method, if just and agreeable to the analogy of the language, will be readily acknowledged by those who are so frequently disappointed in the inspection of other dictionaries It is not a little surprising that a method of accentuation, so peculiarly useful, should till lately have been almost entirely neglected This defect in the generality of our dictionaries did not escape the judicious Mr Sheridan, who insists largely on the utility of placing the accent on the consonant, when the preceding vowel is short, and on the vowel, when the vowel itself is long, and though this does not specify the kind of vowel, with respect to sound which is the subject of accentuation, it at least determines its quantity, and is so far infinitely superior to the common method of placing the accent on the vowel, whether it be long or short

Another and almost exclusive advantage of the present work is, that every monosyllable which swerves from the general rule of pronunciation, is rhymed with such a word as cannot possibly be pronounced otherwise than it is written, or if this cannot be done, it is spelled in such a manner as to take away all ambiguity Thus as the more general sound of the diphthong *ea* is like *e* long and open in *here*, *mere*, &c, wherever it deviates from this sound, a rhyme is inserted to ascertain its pronunciation, *head* therefore is rhymed with *bed*, that it may not be liable to the Scotch pronunciation of this word, as if spelled *heed*, and *great* is rhymed with *bate*, that it may be distinguished from the sound the Irish are apt to give it, as if spelled *greet* A *bow* (to shoot with) is rhymed with *go*, and *bow* (an act of reverence) with *cow*, and *prove*, *dove*, &c, are determined in their pronunciation by the univocal orthography *proove*, *duvv*, &c, by this means the stamina of our language, as monosyllables may be called, are freed from ambiguity of sound, and compounds rendered easier by fixing the pronunciation of their simples

RHYME

The last, though perhaps the least, advantage of the following work, is the complete collection of all the rhymes in the language However insignificant it may seem in this respect, it is at least new For though Bysshe has given us a Dictionary of Rhymes at the end of his Art of Poetry, his Dictionary, if it may be called so, does not contain six thousand words, when Johnson's Dictionary, to which this approaches nearer than any other, has very few short of forty thousand * Here, then, as in the French *Dictionnaire des Rimes* of *Richelet*, the whole language is arranged according to its similar endings, and the English are no longer unfurnished with an assistance to versification, which Abbé du Bos tells us the French poets—*Quoiqu'ils en disent ils ont tous ce livre dans leur arriere cabinet* But had the author seen no farther advantage in this work, than barely furnishing similar sounds for the purposes of poetry, he should have thought his labour ill bestowed It is by no means his intention to vindicate the cause of rhyme to the least prejudice of a nobler verse, which is the peculiar glory of the English as a living language, nor will he insist on the proofs, both from nature and experience, that rhyme may be sometimes admitted to advantage, while Waller, Dryden, and Pope are in everybody's hands † It will only be necessary to observe, that, for fear those who have been accustomed to the common dictionary of rhymes annexed to Bysshe, should find a difficulty in discovering words by this new arrangement, an index of Rhymes, much more copious and correct than any hitherto published, is added, in which the old method of classing the words is continued, and a new and numerous class of allowable rhymes pointed out, with authorities for their usage from our best poets, but for a more satisfactory account of this part of the work, see the Preface to the Index, at the end of this Dictionary

* Into this edition nearly 1800 additional words have been introduced

TELEGRAPHIC ERRORS.

Among other uses of the Rhyming Dictionary, and one that will most commend it to commercial men, is the assistance it affords in deciphering errors in telegrams. All merchants having business relations with America or the Far East use Telegraph Codes, so arranged that each word in their Telegrams represents a whole sentence. Frequently, however, these words are so mutilated in transmission as to be almost unrecognizable As a rule there is not much difficulty in finding the proper word if the ciphers (or symbolical words) in the code are alphabetically arranged, unless the first letters in it have been altered or lost. It is especially in the latter case that this work will be found useful, and every merchant who receives Telegrams of importance should obtain a copy, and insert in their places such proper names or unusual words as he may be likely to receive in his Telegrams, if he does not find them already printed.

An instance of not uncommon word-mutilation may be added to show the value of the book for the purpose above-mentioned In a Telegram received, a word appears as "Sterturn." The merchant goes through the usual course of looking through his Code for any word like this, which will make sense in connection with the remainder of the message, and after wasting an hour or more in trying to decipher the true meaning, is compelled to return the Telegram to the Telegraph Company for repetition.

Probably in the course of the following day he receives the amended message, showing that the word originally despatched was "Overturn," meaning "*Sell-to-arrive* 1,000 *bales Tinnivelly Cotton at 5¾ pence per pound*" By this time, however, the London price has declined to 5¼d per pound, so that he must either run the risk of holding the cotton in a falling market, or submit to an immediate loss of £300 on the previous day's quotation Now had this merchant referred to this book under the letter N for words ending "erturn," he would at once have found the word "Overturn," and saved some hundreds of pounds

We may explain that such an error as the above is not unfrequently caused by incorrect reading of the "Morse" alphabet, the letters *St* being expressed in "Morse" by -- — and the letter *V* by ---—, the initial "O" was either lost or very likely attached to the end of the previous word

Thousands of instances of errors and consequent heavy losses might be given, but no Merchant or Banker requires to be told of them, as they are of almost daily occurrence

As a further assistance in deciphering badly transmitted messages, we append the Morse Alphabet, as used on almost every Telegraph wire throughout the world, and a list of the more common errors occurring in Telegrams

HYMING DICTIONARY

AN

IDEA OF THE ARRANGEMENT OF WORDS IN THIS DICTIONARY

As in other Dictionaries words follow each other in an alphabetical order according to the letters they *begin* with, in this they follow each other according to the letters they *end* with All words therefore that *end* with *a* are placed first in this Dictionary, as all those that *begin* with *a* are placed first in other Dictionaries, those that end with *b* are placed next, and so of the rest The directing letters at the top of each page, are likewise in the same order, that is, they are the last letters of words instead of the first

DIRECTIONS FOR FINDING WORDS

In looking for a word, the last letter is to be sought first, the last but one next, and so on from the last to the first letters of a word in an order exactly contrary to that of other Dictionaries Thus, if I want to find the word *Idea*, I must first look for *a*, among those words which end with *a*, these I find in the page opposite to this The next letter I want is *e*, I therefore look among those words that end with *a*, for a word whose last letter but one is *e*, and find it in the word *Panacea*, the twenty-fourth word from the top, the next letter *d*, I look for among those words that end with *ea*, and find it in the third word after *Panacea*, which is the word I sought So that for the last letter of a word, I look among those words ending with the same letter, for the last letter but one of a word, I look among the last letters but one of these words, and so of the rest

It must be particularly noted, that the directing letters on the top of each page, are to be looked for in the same order, that is, from the right hand to the left

The best way to avoid confusion, will be to look for the letters one by one, and to begin with the first word of every class, and so proceed downwards till the word is found Thus, if I want to find the word *Alphabet*, I keep the last letter *t* in my mind, and turn to that part of the Dictionary where the words ending with *t* are classed, which is near the end The first word of this class I find to be *at*, the next letter I want is *e*, I therefore run my eye down the last letter but one of this class till I come to *bet*, the next letter I want is *a*, which leads me to fix my eye upon the fourth letter from the last, which brings me to *abet*, and so of the rest

As this arrangement is perfectly simple, two or three trials will render it as intelligible as the common order, especially if the word we look for be first written down, and carried along with the eye in its search

Tho' but a *late gem* with a wondrous elation,
Yet like a *great elm* it o'ershadows each station,
Et malgre the office is still a large fee mart,
So joyous the crowd was — you'd thought it a *glee mart*;

But they raged at no news from the nations belligerent,
And I said, *let m rage*, since the air is refrigerant
I then *met large* numbers, whose drink was not sherbet,
Who scarce could look up when their eyes the gas *glare met*;
So when I had learn d, from commercial adviser,
That *mere galt* for sand was the great fertilizer,
I bade Mr *Eaglet*, altho twas ideal,
Get some from the clay pit and so *get m real*;
Then just as my footstep was leaving the portal,
I met an *elm targe* on a great Highland mortal,
With the maid he had woo d by the Loch s flowry *marg let*,
And row'd in his boat which, for rhyme s sake, call barg let,
And blythe to the breeze would have set the sail daily,
But it blew at that rate which our sailors *term gale*, aye;
I stumbled against the fair bride he had married,
When a *merle gat* at large from a cage that she carried,
She gave a loud screech ! and I could not well blame her
But, lame as I was, I d no wish to *get lamer*,
So I made my escape—ne er an antelope fleeter
Lest my verse, like the poet, should limp thro *lag metre*

PREFACE

TO THE

INDEX OF PERFECT AND ALLOWABLE RHYMES

As the principal object of the preceding Syllabic Dictionary was to throw light on the structure, orthography, and pronunciation of our language, it was necessary to adhere strictly to the inverted order of arrangement, that terminations of similar orthography might be classed together, though those of similar sound would sometimes, by this means, be separated, but as the inverted position of the words, though the simplest that could be chosen for this purpose, may possibly at first embarrass the inspector for poetry, an index of rhymes is annexed in the same order as in Poole and Bysshe, though much more copious and correct, besides a reference to an almost infinite number of allowable rhymes, with authorities for their usage from our best poets As an index to allowable rhymes is an attempt perfectly new, it may not be improper to make a few observations with respect to its utility, and answer some objections to which it may be liable

Obs 1 Whatever has been constantly practised by our most harmonious poets, may be safely presumed to be agreeable to the genius of our poetry it is highly probable that our prosody has passed its meridian, and that no reformation can possibly be made without injuring it The delicate ears of a Pope or an Addison, would scarcely have acquiesced in the usage of imperfect rhymes, and sanctioned them so often by their practice, if such rhymes had been really a blemish The same masculine force that supports our poetry without the assistance of any rhyme at all, seems to exempt it from that servile attention to perfectly similar rhymes, to which the French *versification* is inviolably bound. Nay, so far from a defect, there seems to be sometimes a beauty in departing from a perfect exactness of rhyme, as it agreeably breaks that sameness of returning sounds on the expecting ears which in poetry perhaps, as in music, requires something like an occasional discord to make even harmony itself more agreeable

Obs 2 But though an English ear will freely admit of a rhyme between a long and short sound of the same vowel, and sometimes

example, *land*, *N* is the first of the final consonants, *A* the vowel that precedes it, see *AND*, and you will find *band*, *stand*, *command*, &c.

3 But if a diphthong, that is to say, two or more vowels together, precedes the last consonant or consonants of a word, begin at the first of these two vowels, thus, to find the rhymes to *disdain*, look not for *IN*, but for *AIN*, and you will find *brain*, *chain*, *gain*, &c

4 To find a word that ends in a diphthong preceded by a consonant, begin only at the first vowel of the diphthong, for example, to find the rhymes to *subdue*, look for *UE*, and you will find *clue*, *due*, *ensue*, &c

5 All the words that end in a single vowel preceded by a consonant are found by looking for that vowel only, except always the words that end in mute *E*, which are constantly found by the same method that has been already prescribed for finding the rhymes to *persuade*, whose final *E* is silent, and serves only to lengthen the sound of the *A* in the last syllable.

ADVERTISEMENT

Care has been taken in the compiling of this Index to class rhymes together with the most scrupulous precision Such as are called perfect rhymes are exactly similar, those that differ by nicer shades are called nearly perfect, and the rest allowable only So that this collection of words is in some measure a dictionary of pronunciation, and may answer very useful purposes to foreigners and provincials, who, by understanding the sound of one word, may become acquainted with the pronunciation of a whole class Thus, if I would know how the word *gross* is pronounced, that is, whether according to the French or English analogy, I look into that rank of words which terminate in *oss*, but do not find it I then look among those in *ose*, and find it rhymes perfectly with *verbose*, *jocose*, &c And at the same time I avoid being misled by the licences of poets in their frequent usage of the looser and less perfect rhymes

No notice need be taken of the advantages arising from instances being given of plurals and participles, as *lays*, *days*, *obey'd*, *play'd*, &c, as this will immediately appear upon inspection, which, with many other improvements, renders this Index of Rhymes, entirely independent of its connection with the Pronouncing Dictionary greatly superior to every other work of the kind in our language

even between the long and short sounds of different vowels, yet these vowels that are suffered to rhyme are not of a different nature, though called by a different name. The inaccuracy with which they are denominated has but very little influence on the practice of our poets, who, trying them by the only infallible touchstone, the ear, discover the relation between similar vowels, better than by a grammatical analysis. By the usage of the poets, we find the vowels frequently associated according to their radical sound, and that a union is lawful between any vowels of the same family, as it may be called, though the name may be different, therefore, as the *e* in *led* is by no means the real short sound of that letter as heard in its name, or in the word *glede*, it is no wonder if the poets very often associate it with the slender *a*, as heard in *lade*, and of which it is really the short sound The same may be observed of almost every other imperfect rhyme we meet with, if the family sound of the vowel be preserved, the ear acknowledges the affinity, if a vowel of a totally different sound be assumed, the ear immediately detects the incongruous mixture.

Thus the different sounds of the vowels, *i*, *e*, *a*, *o*, *u*, slide into each other by an easy gradation, each of which is sufficiently related to the preceding and succeeding sound to form what is called an allowable rhyme And though it must be confessed that poets have sometimes abused the liberty of rhyming, and wounded the ear by an association of discordant vowels, yet this is no argument against the occasional use of such rhymes as are but gentle inflections of the same radical sound, as these circulate freely through our best compositions, and actually form a part of our prosody

Obs 3 It will be necessary, therefore, to observe, that, although authorities are not brought for the usage of every individual allowable rhyme, the species of these rhymes, if I may call them so, are amply and repeatedly illustrated For the same ear which allows *glass* to rhyme with *place*, or *place* with *peace* and *distress*, will permit *decay'd* to rhyme with *fled*, and *shade* with *mead*, for the consonants with which they terminate do not alter the nature of the preceding vowels, or occasion any diversity in the quality of the rhyme It would, therefore, have been sufficient to have adduced a much smaller number of poetical examples than are here given, as they are all founded on the same principles, and must necessarily stand or fall together

It may be objected, that a work of this kind contributes to extend poetic blemishes, by furnishing imperfect materials and apolo-

gies for using them But it may be answered, that, if these imperfect rhymes were allowed to be blemishes, it would still be better to tolerate them, than cramp the imagination by the too narrow boundaries of exactly similar sounds A want of perfect rhyme, if a real imperfection, is fully compensated by gaining access to a more eligible turn of thought, the most exact and harmonious rhyme would be dearly purchased at the expense of the most delicate abatement in the strength or beauty of an expression And as Byshe supposes that the difficulty of finding rhymes has been the cause that such indifferent ones have been frequently chosen, so it may with as much reason be presumed, that the want of recollecting the licenses of our best writers, and how agreeable they occasionally are to the nature of our poetry, has often been the cause, either of choosing a weak expression for the sake of perfect rhyme, or of relinquishing a valuable one for no other reason than the want of it

DIRECTIONS FOR FINDING RHYMES IN THE INDEX.

The simplest idea of the rhymes in this arrangement is, that the words are divided into five classes according to the vowel in their terminations the first vowel in the last syllable of every word is first to be sought for, and every other subsequent letter in its natural order, that is, from the left hand to the right Thus, if I want a rhyme to *hand*, I look in the first class of vowels *a*, the next letter is *n*, which obliges me to proceed till I come to *ban*, *bran*, &c, the next letter is *d*, which I find after *ANCH*, and before I come to *ANE* If I want a rhyme to *command*, *a* is the first vowel in the last syllable, and I proceed therefore as in *hand*, and so of every other, but as every arrangement of words but the natural is attended with difficulty, I shall endeavour to make the rule for finding rhymes as plain as possible, by adopting the directions of Byshe, omitting that only which relates to the letter *y*, as custom has entirely excluded the termination *ie* in the words *defy*, *rely*, &c, which in his time were frequently written *defie*, *relie*, &c

1 In looking for a word, consider the five vowels, *A*, *E*, *I*, *O*, *U*, and begin at the vowel that precedes the last consonant of the word, for example, to find *persuade*, and the words that rhyme to it, *D* is the last consonant, *A* the vowel that precedes it, look for *ADE*, and you will find *made*, *fade*, *invade*, and all the other words of that rhyme.

2. In like manner, if a word end in two or more consonants, begin at the vowel that immediately precedes the first of them for

Wit kindled by the sulph'rous breath of *vice*,
Like the blue lightning, while it shines *destroys*.—POPE.

But notwithstanding these, and some other vices of the same kind, which some of our most respectable poets have inadvertently fallen into, there are few inspectors into this Index but must observe an obvious analogy between the vowels in the generality of the instances produced, and that, however uncouthly they may sound when pronounced alone, they give no disgust to an English ear, when introduced at proper intervals; but it is not so much my intention to apologize for the use of these imperfect rhymes as to show how they are used, and upon what authority. It is certain they may be used too frequently, and that they are far from being all equally agreeable to the ear. In short, the same taste and delicacy are necessary in this, as in the more essential part of poetry; beauties and blemishes often differ but by nice shades, and it is the master alone who can discern that point where boldness degenerates into harshness, and correctness into frigidity.
